The purpose of this document is to provide the information needed to populate values in the Student Registration/Personal Needs Profile (SR/PNP) data file and instructions for importing the file into PearsonAccess^{next}. The first section of this document has a checklist of tasks that need to be completed before importing the file, Matching Criteria used to match SR/PNP records to student records currently in PearsonAccess^{next}, step-by-step instructions for importing the file into PearsonAccess^{next}, and Helpful Hints. The second section of this document contains a table with the list of fields that are present in the data file.

State Policy for Importing the Student Registration/Personal Needs Profile

State will upload students into PearsonAccess^{next}; districts will have from 1/8/2018-1/26/2018 to update student tests.

Checklist Prior to File Import		
1	Verify student demographic fields used for matching criteria are the same between what is populated in the SR/PNP data file and what is populated currently in PearsonAccess ^{next} .	<input type="checkbox"/>
2	Verify that all required fields are populated. Required field rows are highlighted in green.	<input type="checkbox"/>
3	All expected values match the values found in this document. Bolded text in the Expected Values column must be entered exactly as it appears.	<input type="checkbox"/>
4	Do not delete the header row.	<input type="checkbox"/>
5	Import the file as a Comma Delimited File (.csv file extension) or Fixed File (.txt file extension).	<input type="checkbox"/>

Helpful Hints:

- If using Microsoft Excel and a .csv file, it is recommended that the source file is saved as an Excel spreadsheet to keep formatting. Prior to each import attempt, save the data file as an Excel spreadsheet. Then save again as a .csv file. If an error is encountered, make the updates in the source Excel spreadsheet and save, and then save again as a .csv file. Repeat as necessary.
- A file may contain records with or without errors. The records without errors will be imported into PearsonAccess^{next}. Records with errors will need to be corrected and re-imported into PearsonAccess^{next}. If errors are discovered, the initial import file may be reused by leaving the records without errors in the file, and correcting only the records with errors. When re-importing this file, PearsonAccess^{next} will treat the records without errors as updates, even if no values changed. This will not cause any issues.

Student Matching Rules

When student data is imported into PearsonAccess^{next}, demographic fields are used to identify unique students. When data is updated in PearsonAccess^{next}, matching rules are applied to these fields to identify if records currently exist within the system. This information is important for importing SR/PNP files for the 2017-18 administrations as many students already exist within PearsonAccess^{next} from previous administrations. The table below provides information on the fields used for matching and if they can be updated through an SR/PNP Import.

Core Demographic Fields	Match Hierarchy Level	How Matching Works	Can this field be updated via Student Registration File Import?	Definitions and Notes
Pearson ID	1	Record will match if Pearson ID and at least two of the following Core Demographic Fields Match: <ul style="list-style-type: none"> • State Student Identifier • Local Student Identifier • Last or Surname • First Name • Sex • Birthdate 	No. The Pearson ID is generated by PearsonAccess ^{next} and cannot be modified by end users.	Unique Pearson ID that will move intra state if a student moves district to district or school to school. Assigned within PearsonAccess ^{next} .
State Student Identifier	2	If Pearson ID is blank; Record will match if State Student Identifier and at least two of the following Core Demographic Fields Match: <ul style="list-style-type: none"> • Local Student Identifier • Last or Surname • First Name • Sex • Birthdate 	No. The State Student Identifier cannot be updated by importing a Student Registration File. However, It can be updated through the PearsonAccess ^{next} user interface.	A unique number or alphanumeric code assigned to a student by a state or any other entity.
Local Student Identifier		This is a Core Demographic field used for matching in Hierarchy 1 and 2 Levels. *Note this is not a required field	Yes. The Local Student Identifier value can be updated if the Pearson ID and/or State Student Identifier and at least two of the following Core Demographic Fields match: <ul style="list-style-type: none"> • Last or Surname • First Name • Sex • Birthdate 	A unique number or alphanumeric code assigned to a student by a school system or any other entity.
Last or Surname		This is a Core Demographic field used for matching in Hierarchy 1 and 2 Levels. (Note, only the first 10 characters are used to match on the Last or Surname Field)	Yes. The Last or Surname value can be updated if the Pearson ID and/or State Student Identifier and at least two of the following Core Demographic Fields match: <ul style="list-style-type: none"> • Local Student Identifier • First Name • Sex • Birthdate 	The full legal last name borne in common by members of a family.

Checking the status of a imported file

The **View File Details** screen appears after selecting **Process**. This screen shows the processing status. Select the  icon to refresh the screen.

The screenshot shows the 'View File Details' page in PearsonAccessnext. The breadcrumb trail is 'Colorado > 2017 - 2018 > CMAS: Science and Social Studies Spring 2018 > Colorado'. The page title is 'View File Details'. There are navigation buttons: '< Previous Task', 'Next Task >', and 'Exit Tasks x'. Below the title bar, there are two tabs: '1 Import / Export Data' and '2 View File Details', with a red arrow pointing to a refresh icon on the second tab. The main content area is titled 'Files (1)' and contains a table with one file: 'Student_Registration_Import.csv'. To the right of the file name is a 'Details' link with a refresh icon. Below the file name, the status is 'Pending' with the message 'File has been queued for processing'. Underneath is the 'File Information' section, which lists the following details:

Helpful Hint:

A file may contain records with or without errors. The records without errors are imported into PearsonAccess^{next}. Records with errors need to be corrected and re-imported into PearsonAccess^{next}. The initial import file may be reused by leaving the records without errors in the file, and correcting only the records with errors. When re-importing this file, PearsonAccess^{next} treats the records without errors as updates, even if no values changed. This does not cause any issues.
