CSV FILE RECORD LAYOUT for Customer - Excel

This record layout is for GRT file in 'CSV' format for use with MS Excel. It contains the field start, end, length and description only. Please refer to the Record layouts in the earlier sections for information about the fields and the possible values of the fields.

Note:

1. The Special Codes fields are divided into three columns and the student response fields are divided into six columns because of field length considerations in Excel. In case of student responses, the numbers are preceded by text characters (e. g., MC-1 indicates Multiple Choice session 1, and CR-1 indicates Constructed Response session 1)
2. MS Excel displays very large numbers in scientific notation (e. g. 2E+08, or 1.4E+08). If this type of data appears in a cell, the user can reformat to numerical display by double-clicking on the column header.
3. Leading zeroes are not displayed in Microsoft Excel spreadsheets. The user can modify the format to view leading zeroes by selecting Format - Cells on the Excel spreadsheet menu bar.
