

Reminder

Statewide Financial Assistance Priority Assessment

Attn: Superintendents, Business Managers, Facility Directors

Facility assessment reports are still open for review. If you have asked that others in your district be given access rights, please forward them this e-mail so they may review the reports. To get additional reviewers added to your review teams please contact Dustin Guerin at the e-mail address below.

You have until **February 7, 2012** to review the reports for your district and provide comments, corrections or clarifications to CDE. CDE staff will address your comments and post a revised report, which will become static until next year. Once the static reports are posted, comments can be entered again but the reports will not be updated until the next cycle for annual data updates.

It is important the information in the reports accurately reflects actual building conditions. Your comments and review will help assist CDE with capital construction grant awards in the future.
