- To have a good experience it is suggested that the devices being used to attend be connected via hard wire to the network. If this is not possible try and get to a location where the Wi-Fi or cellular connection is strong.
- Your device should have a working camera, speakers and microphone.
- You can mute both your audio and video while in the conference if you wish.
- We have found some people's microphones and cameras may not work due to permissions in Windows.
- Be sure and check those settings before you join the conference.
- You can do so by typing "Camera Privacy Settings" in the windows search window of the taskbar.
- Jeffco will start the meeting about 15 minutes early, no one can join unless the meeting is started.
