

Indicator 14 – Post-School Outcomes

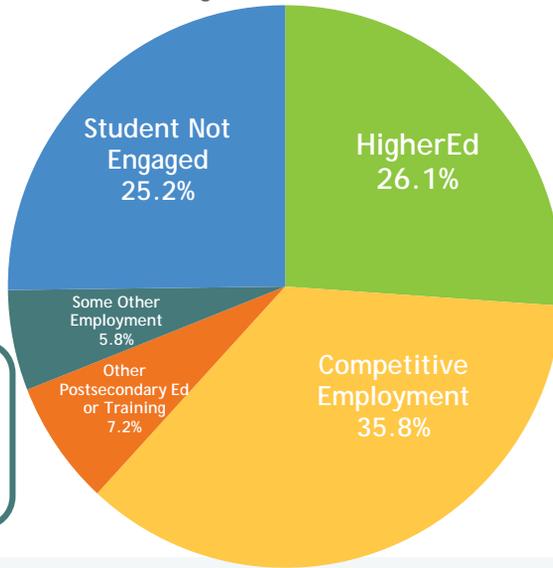

School Year 2016-17

Out of 3,588 former high school students with IEPs who were selected for the interview,

56%

participated in the interview state-wide.

In Indicator 14 - Post-school Outcomes, States report the % of former students with IEPs who are 1) enrolled in higher education, 2) competitively employed, 3) enrolled in some other postsecondary education, training program, or other employment, within 1 year of leaving high school. Those who did not qualify for any of the above categories are considered as "not engaged" in the community.

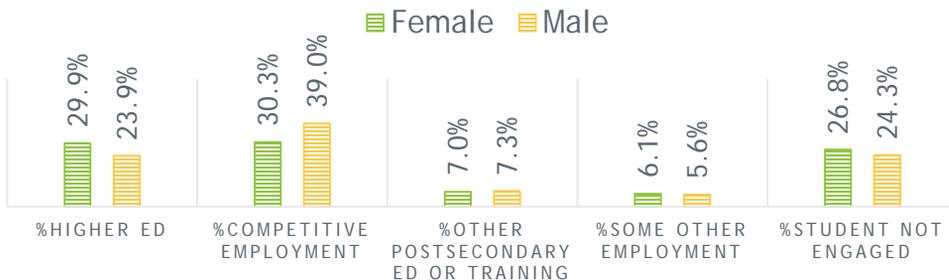

In Colorado, 75% of former students with IEPs were engaged in some way 1 year after leaving high school.

What does it mean to be "Enrolled in Higher Ed," "Competitively Employed," or in any of these categories?

- Enrolled in Higher Ed**
 Youth has been enrolled on a full- or part-time basis in [a community college \(two year program\) or college/university \(four or more year program\)](#) for [at least one complete term](#), at any time in the year since leaving high school.
- Competitively Employed**
 Youth has [worked for pay](#) at or [above the minimum wage](#) in a setting [with others who are nondisabled](#) for a period of [20 hours a week](#) for [at least 90 days](#) at any time in the year since leaving high school. This includes military employment.
- Enrolled in other postsecondary education or training**
 Youth has been enrolled on a full- or part-time basis for [at least 1 complete term](#) at any time in the year since leaving high school [in an education or training program](#) (e.g., Job Corps, adult education, workforce development program, vocational technical school which is less than a two year program).
- Some other employment**
 Youth has [worked for pay](#) or been [self-employed](#) for a period of [at least 90 days](#) at any time in the year since leaving high school. This includes working in a family business (e.g., farm, store, fishing, ranching, catering services, etc.).
- Not Engaged**
 Youth does not qualify for any of the above categories.

PSO BY GENDER

Male students were more likely to be competitively employed, while female students were more likely to be enrolled in higher ed. Females had slightly higher non-engagement rate than males.

Indicator 14 – Post-School Outcomes

Colorado conducts post-school outcome interviews every summer. Each administrative unit (AU)/district contacts former high school students with IEPs a year following their exit between May and September. The collected data are used by the AU to evaluate its effectiveness in preparing students with IEPs for post-secondary success and for State reporting to the Office of Special Education Programing at the U.S. Department of Education.

POST-SCHOOL OUTCOMES BY HIGH SCHOOL EXIT REASON

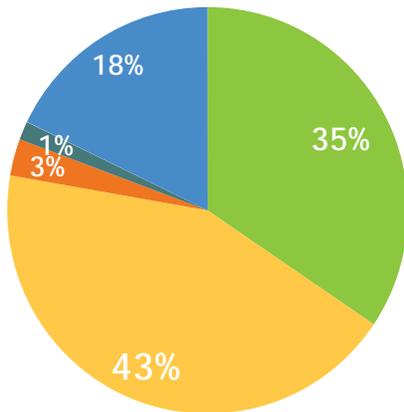

■ Regular Grad Diploma ■ Dropped Out ■ Reached Maximum Age

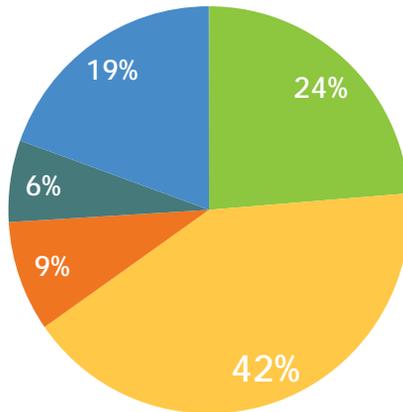

Graduating with a regular diploma was the most common way to exit from HS. 31% of students who graduated with a regular diploma enrolled in higher ed, and 36% were competitively employed 1 year after graduation. This group of students had the lowest non-engagement rate (21%) among all HS exiters. 37% of students who dropped out from HS were competitively employed, and 41% were not engaged 1 year later. The most common outcome for students who reached maximum age was non-engagement.

DID YOU PARTICIPATE OR ARE YOU CURRENTLY PARTICIPATING IN THE SCHOOL TO WORK ALLIANCE PROGRAM (SWAP)?

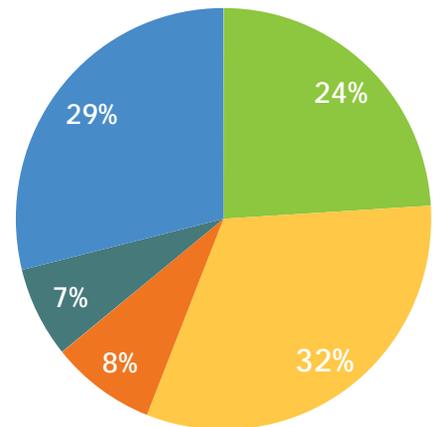

■ Higher Ed ■ Competitive Employment ■ Other Postsecondary Ed or Training ■ Some Other Employment ■ Not Engaged

N/A (The student did not need these services)

Yes (The student needed and participated in these services)

No (The student needed but did not participate in these service)

Almost 80% of students who did not need SWAP were in Higher Ed or Competitive Employment 1 year later; they transitioned successfully without support from SWAP. Students who participated in SWAP were just as likely to be competitively employed as students who didn't need SWAP. Furthermore, students who needed but didn't receive SWAP were least likely to be competitively employed and more likely to be disengaged.
