Delay 52 versus 53 Process clarification from

CDE

C to B (Path 2) Evaluation Completed and Child is Found **ELIGIBLE**

Please know!

It's important to note that although there are 3 possible delays within Path 2, the recent changes that have been made in the system are specific to the “C to B IEP Implementation Delay” only.

This system change was primarily designed to handle reporting for the delay codes of 51, 52, and 53.

System Enhancements:

1. View History will now display any applied IEP Implementation Delays for **C to B IEPs** and a new “Modify” option is available

Special Education		End Edit Local Periods

01 Parent refused to provide consent for evaluation

03 Deceased

05 No valid reason

20 Illness of student or immediate family

21 Parent requested delay in meeting

22 Parent no show, meeting rescheduled

24 Parent cannot be located, surrogate parent process started

25 Parent requested someone else to attend (e.g., legal representation)

26 Weather/school cancellation

27 Parent requested independent educational evaluation

28 IEP team requested additional educational evaluation at eligibility meeting

45 Parent repeatedly fails or refuses to produce the child for evaluation

46 Student moved into the district after evaluation initiated in another district

47 Student moved out of the district after evaluation initiated

48 Parent failed to respond to meeting requests

49 Student's birthday does not fall on a school day

50 Parent revoked consent for evaluation prior to the completion of the evaluation

51 Child is not enrolled in school when expected

52 Parent failed to enroll the child in school; child is never enrolled

So when would we use Modify?

Even though the Modify button isn't actually required to handle the 51, 52, or 53 delay codes, this is an added feature that will allow districts to correct IEP Implementation Delay codes that were entered incorrectly by the teacher.

Frontline will be applying the “modify” ability to all the applicable “Compliance Checks” specific to delay codes in all reporting paths in a future version release.

IEP NOT implemented by Child's 3rd birthday

The modify button can be used to correct the Path 2 Reason for Delay in IEP Implementation Date to any of the following delay codes:

05, 20, 21, 22, 24, 25, 26, 27, 28, 45, 46, 48, 49, 51,
52, 53, 57

Role Permissions

The “Modify” button is available to all staff whose role permissions have been set up to allow **Admin Edit**.

*This is not a separate role permission that has to be set.

Therefore, if your district has given Admin Edit rights to a large number of users, training will need to be given to all around this system change.

Other Things to Know about the Override Feature:

- The Data Collection link will become available on the student's Profile page once the first data collection that contains that student has been run.
- Access to the Data Collection and Override Values links is automatically made available to any role that has rights to perform **Admin Edits**.

Warning:

Using the Data Pipeline “Override” link will NOT permanently change any of the delay codes. The override is only temporary.

This means that the delay codes that are reported in your SPED EOY report WILL BE DIFFERENT than those in Enrich!

Use caution when choosing to override!

State Reporting Scenarios

51,52,53

State Reporting Field: 52

Students who are evaluated in the Spring but parent chooses not to enroll until Fall.

1. Set the IEP Start Date to the child's 3rd birthday or the 1st Day of School (Follow your AU Process).
2. Set the IEP Finalization Delay Reason within the compliance check to - **00 No Delay- Services will start on 3rd Birthday.**
3. End Special Education Program in the Spring prior to your EOY reporting with:
 - Special Edu Process Ended: 52 Student Never Enrolled(If student never returns you would not do anything further)
4. If the student returns in the fall, the student is reactivated in Enrich and is reported in the following school year.

Note: This example reports data in TWO different EOY Years.

If you are using 52 the students program must be ended on or prior to June 30th of the current reporting year.

Example of what View History would look like for students who are evaluated in the Spring but parent chooses not to enroll until Fall and the student returned.

State Reporting Field: 52 to 51

If the student was evaluated during the current school year and ended with a 52, then parents decide to start services earlier:

1. Program will have already been ended with:
 - Special Edu Process Ended: 52 Student Never Enrolled
2. Reactivate in Enrich using the 51: Child is not enrolled in school when expected.

New: Reactivation Feature will allow you to track and enter the 51 Delay Reason Code

Reactivate Special Education

Continuing will reactivate this involvement.

5/3/2018	Student Reactivated	51:Child is not enrolled in school when expected

State Reporting Field: 53

Students who are evaluated in the Spring but parent chooses not to enroll child until Fall.

1. Enter the IEP Start Date as the first day of school in the fall with a delay of 53: Parent Requested Delay in the Start of Services. The student's program will remain OPEN in Enrich.
 - If the student returns in the fall on the first day of school, no changes are needed and services begin as expected
 - If the student does not return on the first day of school, End Special Education with Special Edu Process Ended: 52 Student Never Enrolled
 - If the student then returns at a LATER date, reactivate the IEP with a 51: Child is not enrolled in school when expected. The date entered during the reactivation process will populate the correct IEP Implementation date in the Participation file.

Note: The student will ONLY be reported in the year in which the IEP was implemented.

State Reporting Field: 53

Students who are evaluated in the Spring but parent chooses not to enroll until Fall.

If a parent initially chooses to delay services until the fall, but then decides to enroll their child that same school year, simply:

1. Admin Edit the IEP Start Date to reflect the date services will begin and the student will be reported in the year in which services began
2. If the IEP Start Date is still after the child's 3rd birthday, a 53 delay would still apply

This should be very rare!

In this case, the modify option would not be used, because the physical IEP start date needs to be changed to the true date in which services will begin.
