Colorado Early Literacy Assessment Tool Project Professional Development

As part of the Early Literacy Assessment Tool Project (ELAT), Amplify will provide a series of professional development opportunities. The third in this series is a set of trainings to prepare Principals/Administrators as the Instructional Leader as they assist with data analysis and lead data conversations around DIBELS Next and Burst Data.

What is the focus of the training?

The training will cover the following:

- Connect the Basic Early Literacy Skills to the DIBELS® Next measures
- Differentiate between information available at the classroom level and the aggregate level
- Navigate the Reporting and Analysis Suite
- Interpret Reporting and Analysis Suite Reports using your school's Beginning of Year Data (please bring a laptop and your mCLASS username and password).
- Leading data conversations in achieving data-informed instruction
- Communicate goals for DIBELS Next implementation at your school site

Who should attend this training?

The principal of each school participating in the ELAT program should attend this training. Districts may send a district level person as long as there is room at the session.

What should staff bring to the training?

Training participants should bring a laptop, if available, as some reports are more easily accessed through a traditional browser (instead of the mobile browser on portable devices). Staff will want to ensure that they know their mCLASS username and password prior to attending the training.

Who do I contact if I have questions?

Karen Cushman, Account Manager Amplify - kcushman@amplify.com - 765-625-1105 Donna Bright, CDE - Bright b@cde.state.co.us - 303-866-6002

Please note that the registration for a training will close one week prior to the scheduled training date.
