

## **DIBELS On-line Modules:**

Amplify and CDE are pleased to announce an exciting on-line opportunity for local trainers and administrators in supporting and training your staff in the use of DIBELS Next. This is offered as an additional tool and is not an “on-line” course that must be completed in a certain time frame.

Each school can enroll up to three people at no charge. These modules will be provided through the project and once you have enrolled you will have access forever. These resources can be used for training in group settings as well as used for supporting individuals in your school. [Directions to enroll can be found here.](#)

Topics for the on-line DIBELS Next modules will:

- provide extensive review of administering all measures,
- provide practice scoring opportunities
- provide detailed instructions on accessing web reports

These modules were offered year one 2013/14 and will be offered again year two 2014/15 until we deplete the licenses.
