Summary of Services provided:

For more than 10 years, Sterling Literacy Consulting (SLC) has provided expert support to educational institutions of all types toward the shared goal of accelerating student achievement. Headquartered in Denver, CO, Sterling Literacy Consulting offers customized services based on the needs of states, districts, schools and students. SLC excels in identifying and responding to specific needs, and working collaboratively to create a comprehensive strategy designed to facilitate buy-in at all levels.

Sterling Literacy Consulting provides regular Professional Development, Literacy Audits and Teacher Workshops. SLC offers weekly, bi-monthly, monthly and quarterly job-embedded **Professional Development** to meet the needs of your school. We work with your teachers and literacy leaders to provide coaching and support to help improve the lesson planning and instruction provided to students. Job-embedded coaching is viewed as a powerful and effective method of supporting teachers within the context of the work that they do each day. Our **Literacy Audits** evaluate the current literacy practices in your school or district and include a report highlighting the strengths and challenges for each school along with a set of detailed recommendations. We also offer a variety of **Teacher Workshops** in ½ day, full day and 2-day sessions. Some topics include: Using Data to Drive Instruction, Close Reading, Developmental Word Study, Text Complexity, Differentiation, SBRR and the 5 Components of Reading and Early Literacy.
