

Great Teaching Leads to Great Learning – Colorado’s Educator Effectiveness Initiative

Students and teachers are on the educational expedition together, **learning, growing, exploring** and **achieving**. Helping teachers to be the best they can be — helps students be the best they can be.

In Colorado, there is a new evaluation process for supporting teachers’ ongoing professional growth. It’s an opportunity for teachers to share their strengths with one another and continue to refine their individual teaching techniques through professional development — opening doors as they collaborate with their peers, principals, parents, and others to improve their instruction and generate new ideas.

With the new evaluation process, teachers can clearly identify where they excel and where there are opportunities for more growth. They also receive clear, constructive feedback based on shared expectations and understanding.

Great teachers love to learn — continuous learning leads to great teaching. Great teaching motivates students to be great learners.

And great learning helps all students reach Colorado’s ultimate goals for all learners to be **engaged, fulfilled, challenged, motivated** and **prepared** ... for success in school, in careers and in life.
