

School Nutrition Programs

Purpose

CDE's Office of School Nutrition administers nutrition programs in local school districts and charter schools to promote the health and well-being of children. The programs are part of the U.S. Department of Agriculture and include:

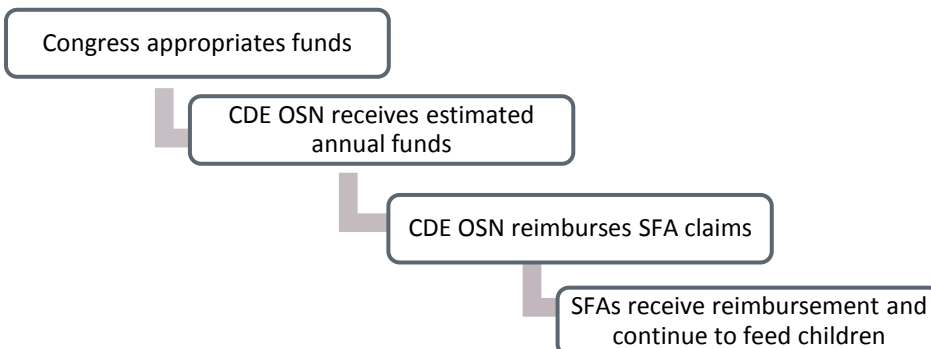

- **National School Lunch Program (NSLP) and School Breakfast Program (SBP):** School meals are planned for students ages four through 18 years. The NSLP and SBP can provide more than 50 percent of nutrient intake on school days.
- **Summer Food Service Program, Fresh Fruit and Vegetable Program, Afterschool Care Snack Program and Special Milk Program:** These programs provide meals and snacks to children at times when the NSLP and SBP are not operating.

All of the child nutrition programs assist children in families with limited resources and food insecurity. The programs provide a safety net to meet nutritional needs. Households with incomes less than 185 percent of poverty level receive meals and snacks for free or reduced price.

Office of School Nutrition Responsibilities

- Reimburses school food authorities for meals and snacks
- Monitors school food authorities to ensure compliance with state and federal guidelines and regulations
- Provides in-person and online trainings
- Teaches classes and workshops at conferences
- Offers specific technical assistance

Funding for School Nutrition Programs
