

## *Sample Measures of Student Outcomes for School Psychologists*

---

- Surveys that address effectiveness of consultation
- Teacher/parent/student satisfaction surveys
- Results of climate and safety surveys
- Log of hours that document consultation activities
- Log of hours that document student services was provided
- Reduction in suspensions, expulsions, and office discipline referrals (could be based on SWIS data, district data, etc.)
- Closing achievement gap
- Quantitative outcomes of mental health interventions that address treatment goals (e.g. pre- and post-test data, direct observation, etc.)
- Improvement made on mental health goals and Behavior Intervention Plans included in student IEPs
- Measures of fidelity of implementation of behavior plans, assessment, accommodations and/or modifications
- Growth in PBIS data demonstrating implementation with fidelity (e.g. BOQ)
- An increase in staff knowledge and/or effectiveness as a result of professional development and trainings that school psychologists provide
- Timely crisis response and recovery
- Compliance with State Performance Plan indicators (e.g. disproportionality, least restrictive environment, reducing suspensions & expulsions, parent involvement, completion timelines)
