

2015-16 Rubric for Evaluating Colorado’s Specialized Service Professionals: School Nurses

Definition of an Effective School Nurse

Effective school nurses are vital members of the education team. They are properly credentialed and have knowledge, skills and commitments necessary to advance the well-being, academic success, life-long achievement and health of students. Effective school nurses strive to support growth and development in the least restrictive environment, close achievement gaps and prepare diverse student populations for postsecondary and workforce success. Effective school nurses employ evidence-based strategies to promote health and safety; intervene with actual or potential health problems; provide case management services to nurture student and family capacity for adaptation, self-management, self-advocacy and learning. Effective school nurses communicate high expectations to students, staff and administrators and promote diverse strategies to engage them in a supportive learning environment. They have a deep understanding of the interconnectedness of the home, school and community and collaborate with all members of the education team to strengthen those connections. Through reflection, advocacy and leadership, school nurses enhance the academic achievement and personal/social development of their students.

Observations, Required Measures and Other Evidence/Artifacts for School Nurses

S.B. 10-191 REQUIRES MULTIPLE MEASURES OF EDUCATOR PERFORMANCE MEASURED ON MULTIPLE OCCASIONS THROUGHOUT THE YEAR. For specialized service professionals this requirement is defined as required measures and optional additional measures (evidence/artifacts). While the rubric serves as the data collection tool for observations, districts and BOCES must determine the method for collecting data regarding required measures and additional evidence/artifacts. This chart serves as a reminder of the required measures that must be discussed annually and evidence/artifacts that may be discussed at the end of the evaluation cycle to confirm the accuracy of ratings.

SHALL BE BASED ON AT LEAST ONE OF THE FOLLOWING PERFORMANCE MEASURES, WHEN APPROPRIATE TO THE SSP'S ASSIGNED DUTIES:

- Student perception measures, where appropriate and feasible
- Peer feedback
- Parent or guardian feedback
- Student support documentation

ADDITIONAL EVIDENCE/ARTIFACTS:

Evaluation of professional practice may include additional measures such as those listed below. These are provided as examples of evidence the evaluator and/or educator being evaluated may share with each other to provide evidence of performance in addition to observations and evaluator ratings collected on the rubric.
