Project AWARE

Youth Mental Health First Aid

Funding for **Youth Mental Health First Aid** classes is available through the Project AWARE Grant at the Colorado Department of Education. CDE can provide these trainings at no cost to host organizations. Grant objectives encourage that the target audience for the trainings be Youth Serving Adults who work primarily with the 12-18 age range.

Common target audiences can include:

- Teachers
- Para-professionals or Para-educators
- School Administrators
- Transportation Staff
- Athletic Coaches and Physical Education Staff
- School Support Staff (monitors, cafeteria staff, janitorial staff, tutor, after-school programs)
- Juvenile Justice or Corrections
- First Responders (police, firefighters, emergency health)
- Spiritual or Religious Leaders or support
- School Nurses

We can make these trainings tailored to available scheduling as much as possible. The 8 hour day can be broken into two 4 hour days if needed. We can provide these trainings for specific schools, for individual organizations, specific districts or regionally. Many schools and districts have chosen to offer these trainings for Professional Development days with great feedback from staff.

To request funding for trainings, to schedule trainings or professional development days, or for more information on Youth Mental Health First Aid trainings generally, please contact:

Youth Mental Health First Aid

Youth Mental Health First Aid USA is an 8 hour public education program which introduces participants to the unique risk factors and warning signs of mental health problems in adolescents, builds understanding of the importance of early intervention, and teaches individuals how to help an adolescent in crisis or experiencing a mental health challenge. Mental Health First Aid uses role-playing and simulations to demonstrate how to assess a mental health crisis; select interventions and provide initial help; and connect young people to professional, peer, social, and self-help care.

WHAT WILL PARTICIPANTS LEARN?

The course teaches participants the risk factors and warning signs of a variety of mental health challenges common among adolescents, including anxiety, depression, psychosis, eating disorders, AD/HD, disruptive behavior disorders, and substance use disorder. Participants **do not** learn to diagnose, nor how to provide any therapy or counseling – rather, participants learn to support a youth developing signs and symptoms of a mental illness or in an emotional crisis by applying a core five-step action plan:

- Assess for risk of suicide or harm
- Listen nonjudgmentally
- Give reassurance and information
- Encourage appropriate professional help
- Encourage self-help and other support strategies

The Youth Mental Health First Aid USA curriculum is primarily focused on information participants can use to help adolescents and transition-age youth, ages 12-18.

WHO SHOULD TAKE THE COURSE?

The course is designed for adults who regularly interact with adolescents (teachers, school staff, coaches, youth group leaders, parents, etc.), but is being tested for appropriateness within older adolescent groups (16 and older) so as to encourage youth peer to peer interaction. In January 2013, President Obama recommended training for teachers in Mental Health First Aid. Since 2008, the core Mental Health First Aid course has been successfully offered to hundreds of thousands of people across the USA, including hospital staff, employers and business leaders, faith communities, law enforcement, and the general public.

WHO CREATED THE COURSE?

Mental Health First Aid USA is coordinated by the National Council for Behavioral Health, the Maryland Department of Health and Mental Hygiene, and the Missouri Department of Mental Health. Mental Health First Aid USA worked with experts at the National Technical Assistance Center for Children's Mental Health at the Georgetown University Center for Child and Human Development to develop the youth program.

WHERE CAN I LEARN MORE?

To learn more about the Mental Health First Aid USA, or to find a course or contact an instructor in your area, visit www.MentalHealthFirstAid.org.
