

### Daily Milk Inventory Form

---

Program sponsors must keep records that document adherence to all federal and state rules and regulations for the Special Milk Program (SMP), including inventory of the milk used and served to children.

Non-pricing programs may report milk served based on their milk inventory. Use this worksheet to help determine the number of half-pints of milk served each month.

#### Daily Milk Inventory Form Instructions:

1. If required convert all milk purchased and milk served to half pints before making entries
    - a. 5 gallons = 80 half pints, 1 gallon = 16 half pints,  $\frac{1}{2}$  gallon = 8 half pints
  2. Use the following method to arrive at the number of half pints of milk served to children to be claimed for reimbursement
    - a. Add beginning inventory (A) with additional half pints of milk purchased (B) = Total Milk (C)
    - b. Subtract milk served to adults (E) and milk used for cooking (F) from Total Milk (C)
    - c. This will equal the number of half pints served to children (D)
    - d. Ending inventory (G) = Total Milk – (milk served to students + adults + milk used for cooking)
  3. Count the remaining milk left to double check your ending inventory
    - a. The ending inventory of the day served will be your beginning inventory the following day
-
