If a public document is available, it will be shown here.
Note: In the case of multiple public records being available, you will see multiples of the same title as shown here.

Rosters

Available Rosters for Download

To generate a roster of public licensee and discipline information, check the box next to the credential type then click "Continue" at the bottom of the page. You may select multiple credential types.

The information contained in these rosters is public. Any additional information cannot be released without the consent of the educator as educator files are confidential. For more information, please visit the [Records Release Information](#) page of our website.

If you are looking for a public document pertaining to a disciplinary action taken against an educator, you must first run the roster and search for those with disciplinary actions and then return to the public lookup and search by that educator's name.

Select which credential type you would like a roster of.
Note: It is best to search one type at a time as some of the files will be rather large and will take some time to compile and be available for download.
