

**Advanced – Performance Level 4 (Score range: 589 to 830)**

Students demonstrate equivalency among fractions, decimals, and percents; apply number sense; solve real-world problems using geometric and numeric patterns; solve problems using ratios and proportions; describe the likelihood of events based on a set of data; identify and apply geometric attributes and coordinate geometry to describe, create, and reason about 2-dimensional figures; use standard and metric measurement; use appropriate methods to solve problems using decimals, mixed numbers, and fractions.

Proficient – Performance level 3 (Score range: 520 to 588)

Students recognize equivalency of commonly used fractions and percents; use simple geometric and numeric patterns to solve real-world problems; use single variables; construct, analyze, compare, and draw conclusions based on data displays; calculate mean values; make predictions based on data; identify attributes of geometric shapes; use x- and y-coordinates in quadrant 1 of a coordinate plane; apply distance in scaled diagrams; add, subtract, multiply, and divide whole numbers; apply appropriate method to solve word problems with whole numbers, calculate with decimals in monetary form.

Partially Proficient – Performance Level 2 (Score range: 454 to 519)

Students recognize, represent, and extend simple geometric, numeric patterns using pictures, tables, charts and symbols; construct bar graphs with appropriate intervals; read and plot points in quadrant 1 of a coordinate plane; determine perimeter.

Unsatisfactory – Performance Level 1 (Score range: 240 to 453)

Students recognize, represent, and extend simple geometric, numeric patterns using pictures, tables, charts, and symbols, construct bar graphs with appropriate intervals; read and plot points in quadrant 1 of a coordinate plane; determine perimeter.
