

## Overview of the Prezi workspace

---

- Infinite canvas
- Show relationships with scaling and frames
- Bubble menu (appears top left; shown to the right)
  - Write (add text)
  - Insert (add images, shapes)
  - Frame (group related concepts, add focus)
  - Path (connect objects in a sequence for presentation)
  - Colors (font and color sets)
- Zebra to manipulate objects

## Helpful hints

---

- SHIFT + Zebra rotate wheel to rotate in 15° increments
- When you're resizing a text element, you'll see it "highlight" briefly when it's at the same scale of another text element in your view
- A mouse with a scroll wheel allows you to zoom in and out easily
- SHIFT + Drag to select multiple objects
- Images work best as SWF or PDF
  - Use [web2pdfconvert.com](http://web2pdfconvert.com) to get PDF screenshots
- Screen captures should be made at 1024x768 resolution
- Embed YouTube vids just by pasting in the URL of the video
- You can often "draw" using just letters and other keyboard characters
- Download to present offline (beware embedded video!)
- Clickers work great!
