FORWARD SERPENTINE

1. Begin exercise with the vehicle stopped before the first cone.
2. Pull forward until the bumper is adjacent to the first cone.
3. Stop vehicle.
4. Turn the steering wheel as far to the right as possible.
5. Begin pivoting around cone while watching for right rear dual to pass cone.
6. Stop vehicle.

7. Turn steering wheel all the way to the left.

8. Pull forward until the left rear dual is just before the cone.

9. Stop vehicle.

10. Turn the steering wheel as far to the right as possible.
11. Move slowly while watching for the right cone to appear in your right mirror.

12. Pull forward until the left rear dual passes the cone.
13. Straighten the wheels once you have passed the last cone.

14. The exercise is completed once your vehicle has completely cleared the last cone.
