

As members of the Grant Parent Group, we would like to express our support for the Innovation Plan proposed for Grant Beacon Middle School. Over the last two years, our group of committed parents has worked diligently to help the Grant administration and staff promote our school and create an environment that fosters outstanding student achievement and community involvement. We are excited about the possibility of achieving Innovation status to help Grant continue to meet this goal.

As parents, we believe that the Innovation Plan's key components of blended learning, community enrichments, and student leadership will greatly benefit our own children and will be successful to improve the motivation and academic achievement of all the diverse students at Grant. We strongly support Grant's mission to serve every student and are confident that the Innovation Plan provides the right ingredients to guarantee that our students will be among the highest in academic growth in the state, be well-rounded in their interests and abilities, and be recognized in the community for outstanding leadership.

We have made tremendous strides toward reaching many of our goals already and Innovation status will provide us with the resources and the best opportunities to continue this momentum. Innovation status will position Grant as a shining example of what a Denver public school can achieve and as the first choice for all students and parents.
