

# Colorado Academic Standards Social Studies

Standards are the topical organization of an academic content area. The four standards of social studies are:

**1. History**

History develops moral understanding, defines identity and creates an appreciation of how things change while building skills in judgment and decision-making. History enhances the ability to read varied sources and develop the skills to analyze, interpret and communicate.

**2. Geography**

Geography provides students with an understanding of spatial perspectives and technologies for spatial analysis, awareness of interdependence of world regions and resources and how places are connected at local, national and global scales.

**3. Economics**

Economics teaches how society manages its scarce resources, how people make decisions, how people interact in the domestic and international markets, and how forces and trends affect the economy as a whole. Personal financial literacy applies the economic way of thinking to help individuals understand how to manage their own scarce resources using a logical decision-making process of prioritization based on analysis of the costs and benefits of every choice.

**4. Civics**

Civics teaches the complexity of the origins, structure, and functions of governments; the rights, roles and responsibilities of ethical citizenship; the importance of law; and the skills necessary to participate in all levels of government.

# 1. History

The study of history prepares students to develop critical thinking skills in an effort to explain the human experience through events of the past. Discerning clarity from the jumble of conflicting facts and sources, students get a clearer picture of how individuals, communities, and the world connect, both past and present. History develops moral understanding, defines identity and creates an appreciation of how things change, while building judgment and decision-making skills. History enhances the ability to read varied sources and develop the skills necessary to analyze, interpret, and communicate.

History inspires by exposing students to the wonders and beauty of the past. The historical perspective prepares for an ever-changing future by helping to understand changes in the past. It allows students to gain perspective and develop better judgment by discovering and uncovering the complexity of human beings. This allows students to better understand themselves as individuals and their place in a complex and often confusing society. History provides examples of ethical behavior and the context for change, and illustrates the importance of responsible members of society in both our country and our world.

History is a critical component in the future success of a student in the 21<sup>st</sup> century world. Inquiry is the central component of historical thinking. Students learn the skills of reading, interpreting and analyzing historical sources and develop the ability to craft a well-constructed and communicated historical argument. History teaches the interpretive, analytical, and critical thinking skills that will allow students to become productive citizens in the future.

## **Prepared Graduates**

The prepared graduate competencies are the preschool through twelfth-grade concepts and skills that all students who complete the Colorado education system must master to ensure their success in a postsecondary and workforce setting.

### **Prepared Graduate Competencies in the History standards are:**

- Develop an understanding of how people view, construct, and interpret history
- Analyze key historical periods and patterns of change over time within and across nations and cultures

## 2. Geography

[ ]The study of geography creates an informed person with an understanding of spatial perspective and technologies for spatial analysis; and an awareness of the interdependence of the world regions and resources, and how places are connected at the local, national, and global scales. Students understand the complexity and interrelatedness of people, places, and environments. Geography helps students appreciate the dynamic relationships and complexity of the world.

The skills, concepts, and knowledge acquired in geography are fundamental literacy components for a 21st century student. Use of critical thinking, information literacy, collaboration, self-direction, and invention are apparent in every facet of geographic education. Geography helps students develop a framework for understanding the world, ultimately contributing to the creation of informed citizens.

### **Prepared Graduates**

The prepared graduate competencies are the preschool through twelfth-grade concepts and skills that all students who complete the Colorado education system must master to ensure their success in a postsecondary and workforce setting.

#### **Prepared Graduate Competencies in the Geography standard are:**

- Develop spatial understanding, perspectives, and personal connections to the world
- Examine places and regions and the connections among them

### 3. Economics

Economics and personal financial literacy teach students the skills, knowledge, and habits that they must master in order to contribute in a positive manner to society. Economics and personal financial literacy teach how to understand personal responsibility, set goals, create plans, evaluate choices, value entrepreneurship, comprehend globalization and international connections, and learn to make rational decisions through critical analysis.

Economics teaches students how society manages its scarce resources, how people make decisions, how people interact in the domestic and international markets, and how forces and trends affect the economy as a whole. Personal financial literacy applies the economic way of thinking to help understand how to manage scarce resources using a logical decision-making process that involves prioritization based on analysis of the costs and benefits of every choice.

Economics and personal financial literacy are essential to function effectively in personal lives, as participants in a global economy, and as citizens contributing to a strong national economy. As citizens, workers, consumers, savers, and investors, members of society must have a level of economic and personal financial literacy that enables them to understand how economies function and to apply economic analysis in their own lives.

#### **Prepared Graduates**

The prepared graduate competencies are the preschool through twelfth-grade concepts and skills that all students who complete the Colorado education system must master to ensure their success in a postsecondary and workforce setting.

#### **Prepared Graduate Competencies in the Economics Standard are:**

- Understand the allocation of scarce resources in societies through analysis of individual choice, market interaction, and public policy
- Acquire the knowledge and economic reasoning skills to make sound financial decisions

## 4. Civics

Civics has an impact on every individual daily through the work of city councils, state legislatures, Congress and school boards. Civics teaches students the complexity of the origins, structure, and functions of governments; the rights, roles, and responsibilities of ethical citizenship; the importance of law; and the skills necessary to participate in all levels of government.

Civics is a foundational component of the educational experience and critical to the continued success of our society. A democratic and free society relies on the skills, intelligence, engagement and virtue of its citizens. Our students will one day be responsible for strengthening our civic culture based on the knowledge they learn at school, their own values, and their choices for action. Democracy demands that they have these tools to be responsible contributors to civic culture.

### **Prepared Graduates**

The prepared graduate competencies are the preschool through twelfth-grade concepts and skills that all students who complete the Colorado education system must master to ensure their success in a postsecondary and workforce setting.

#### **Prepared Graduate Competencies in the Civics standard are:**

- Analyze and practice rights, roles, and responsibilities of citizens
- Analyze the origins, structure, and functions of governments and their impacts on societies and citizens
