The following chart provides ideas for eligible gifted education expenditures. The primary goal of the gifted state categorical fund is to provide resources and support for the instruction and growth of gifted students. Areas for eligible expenditures are: personnel who work directly with gifted students and the gifted program; student instructional activities; student materials; activities related to gifted education; equipment used for the instruction identification or assessment of gifted students; and professional development for educators/parents of gifted students. The list is not exhaustive of what local districts might include to support gifted students within the above targeted areas.
