

## ***Guiding Questions to Help Highlight Underlying Student Academic Strengths and Weaknesses***

- What are the standards at each grade students are expected to know and be able to do?
- How are teachers identifying student confusion, misunderstanding and gaps in knowledge?
- What “in the moment” (formative) techniques or tools are teachers using to systematically gauge each student’s progress?
- What quarterly benchmark (interim) quiz or test are teachers and schools using to systematically determine knowledge and skill learning gaps?
- Where in the state assessment results does your district go to find persistent knowledge and skill gaps per grade and how do educators learn from this information?
