## **COLORADO STATE PUBLICATIONS CLASSIFICATION SCHEDULE**

Colorado State Publications Depository & Distribution Center  
29th Edition

### **Introduction**

The Colorado State Publications Classification Schedule is the official classification schedule of the Colorado state publications depository system. This is the twenty-ninth edition of the schedule since 1981.

The agency names in the classification schedule conform to AACR2 format, and wherever possible, have been revised to show agency reorganizations as they have occurred since 1979. Organization prior to 1979 is attempted, but is not rigorously reflected in the schedule. For earlier time periods, publications are frequently simply classed with a larger entity

The following non-monographic-series serials policies on serial classification have been in place since 1993:

- a serial run will have one number even if the publishing agency's hierarchical placement within the departmental organization changes. If a unit moves from one department (first level agency) to another, the call number will be split.

- a serial run will have one number even if the publishing agency, below the department level, undergoes a name change, as long as the main entry for the publication does not change.

- a serial run will have just one number when the title changes, but neither the name nor the hierarchical position of the publishing agency changes.

The Colorado State Publications Library stopped collecting publications from the Denver Regional Council of Government (DCG), the Regional Transportation District (RTD), and the Urban Drainage and Flood Control District (UD) in 1992. In 1998 all materials in these ranges of the classification schedule were removed from the collection. These agencies remain in the classification schedule. Most of the Regional Library System (RLS) material was removed in 2000.

Sometime in the 1990's the State Publications Library stopped collecting publications from Rocky Mountain Forest and Range Experiment Station (Fort Collins, Colo.)(UCSU20/12). In 2002 all materials in this classification number were removed from the collection.

This schedule includes an updated keyword index to agency names.
