| Focus on a priority performance challenge. |  |  |  |  |
| Determine a comparison point against which performance targets will be set. |  |  |  |  |
| Determine the time frame needed to meet expectations (not more than five years after a "turnaround" or "priority improvement" designation). |  |  |  |  |
| Determine progress needed within the next two years. |  |  |  |  |
| Describe Annual Performance Targets for the next two years. |  |  |  |  |

## School Target Setting Form

Directions: Complete the worksheet below. While schools may set targets for all performance indicators, at a minimum they must set targets for those priority performance challenges identified in Section III (e.g., by disaggregated student groups, grade levels, subject areas).

Schools are expected to set their own annual targets for academic achievement, academic growth, academic growth gaps and postsecondary and workforce readiness. At a minimum, schools should set targets for each of the performance indicators where state expectations are not met - in each area where a priority performance challenge was identified; targets should also be connected to prioritized performance challenges. Consider last year's targets (see Worksheet \#1) and whether adjustments need to be made. For each annual performance target, identify interim measures that will be used to monitor progress toward the annual targets at least quarterly during the school year.

# Selecting Comparison Points 

## Academic Achievement Comparison Points

State Required Metric: percent proficient and advanced

## Comparison Points:

- $\%$ P/A that would receive a "meets" rating = the 50th percentile for Colorado schools for the 2009-10 school year (baseline).
- The \%P/A that would receive an "exceeds" rating = the 90th percentile for Colorado schools for the 2009-10 school year.
- District expectations for \%P/A.

## Determining the Comparison Point:

1. Clarify which content area, grade level, and/or disaggregated is the focus for the priority performance challenge for the \%P/A metric.
2. Consider the $50^{\text {th }}$ and $90^{\text {th }}$ percentile of Colorado schools for $\%$ proficient or advanced for:

- The school level (elementary, middle, and high).
- The content area(s) that is the focus of your priority performance challenge(s).

3. Is the school's \%P/A below the typical school in Colorado ( $50^{\text {th }}$ percentile value)? Consider the $50^{\text {th }}$ percentile value as a comparison point.
4. Is the school's $\% \mathrm{P} / \mathrm{A}$ at or above the school at the $50^{\text {th }}$ percentile? Consider the $90^{\text {th }}$ percentile value as a comparison point?
5. Consider performance expectations established by the district for achievement.
6. Select the comparison point ( $50^{\text {th }}$ percentile, $90^{\text {th }}$ percentile, district expectations) that would be ambitious but attainable for the school to meet.

Alternative Metric: percent unsatisfactory

## Academic Growth and Growth Gap Comparison Points

State Required Metric: Median Growth Percentile (MGP)

## Comparison Points:

- If the MGP is < the Median Adequate Growth Percentile (AGP), then the MGP that would receive a "meets" rating $=55^{\text {th }}$ percentile, the MGP that would receive an "exceeds" rating $=$ $70^{\text {th }}$ percentile.
- If the MGP is >= AGP, then the MGP that would receive a "meets" rating $=45^{\text {th }}$ percentile; the MGP that would receive an "exceeds" rating $=60^{\text {th }}$ percentile.
- If the MGP is $>55$ but less than AGP, consider using the AGP as a comparison point.

## Determining the Comparison Point:

1. Clarify which content area and grade level(s) (and/or disaggregated group) is the focus for the priority performance challenge for the MGP metric.
2. For that group of students, compare the school's median growth percentile to the median adequate growth percentile.

- If MGP < AGP, choose a comparison point not less than 55 . Consider also $70^{\text {th }}$ percentile.
- If MGP >= AGP, choose a comparison point not less than 45 . Consider also the $60^{\text {th }}$ percentile.
- If MGP > 55 but less than AGP, consider using AGP as a comparison point.

3. Consider performance expectations established by the district.
4. Select a comparison point for the median growth percentile of your identified group of students.

Other Growth Metrics: \% making catch-up growth, \% making keep-up growth, \% making moveup growth

| Metrics | Comparison Points |
| :--- | :--- |
| \% making catch-up growth | State \% making catch-up growth |
|  | District \% making catch-up growth |
|  | $100 \%$ making catch-up growth |
| \% making keep-up growth | State \% making keep-up growth |
|  | District \% making keep-up growth |
|  | $100 \%$ making keep-up growth |
| \% making move-up growth | State \% making move-up growth |
|  | District \% making move-up growth |
|  | $100 \%$ making move-up growth |

## Postsecondary and Workforce Readiness Comparison Points

State Required Metrics: Graduation Rate (4,5,6,7-year), Disaggregated Graduation Rate (4, 5, 6, 7-year), Drop-out Rate, Average Colorado ACT Composite Score

Comparison Points

| Metrics | Possible Comparison Points |
| :---: | :---: |
| Graduation Rate (4, 5, 6, 7-year) | Minimum state expectation $=80 \%$ |
|  | Exceeds rating: at or above 90\% |
| Disaggregated Graduation Rate (4, 5, 6, 7-year) | Minimum state expectation $=80 \%$ |
|  | Exceeds rating: at or above 90\% |
| Drop-out Rate | Minimum state expectation |
|  | - 3.6\% (1-year) or |
|  | - 3.9\% (3-year) |
|  | Exceeds rating: at or below 1\% |
| Average Colorado ACT Composite Score | Minimum state expectation |
|  | - 20.0 (1-year) |
|  | - 20.1 (3-year) |
|  | Exceeds rating: at or above 22 |

## Determining the Comparison Point:

1. Determine which postsecondary and workforce readiness metric(s) will be the focus of your post-secondary and workforce readiness target(s).
2. Compare current performance to minimum state expectations for that metric.
3. If current performance is below minimum state expectations, consider minimum state expectations as a comparison point.
4. If current performance is above minimum state expectations, consider the state "exceeds" rate as a comparison point.
5. Consider performance expectations established by the district.
6. Select a comparison point for selected postsecondary and workforce readiness metric(s).

## Some Alternative Post-Secondary and Workforce Readiness Metrics:

- Percent/number of students enrolling in a post-secondary institution within one year after graduation
- Within Colorado remediation rates (percent of recent graduates attending Colorado public institutions that required remediation)
- AP/IB participation
- Percent/number of students scoring high enough on AP/IB tests to receive college credit
- ACT scores by content area

## Academic Achievement

The Achievement Indicator reflects a school's proficiency rate: the percentage of students proficient or advanced on Colorado's standardized assessments. This includes results from CSAP/TCAP and CSAPA/TCAPA in reading, writing, math and science, results from Lectura and Escritura.

## Academic Growth and Academic Growth Gaps

 proficiency assessment, to determine language proficiency progress for English learners.

For Academic Growth and Academic Growth Gaps, the median growth percentile required to earn each rating depends on whether or not the school met adequate growth. Schools that met adequate growth use the rubric on the left; schools that did not meet adequate growth use the rubric on the right.

## Postsecondary and Workforce Readiness

The Postsecondary and Workforce Readiness Indicator measures the preparedness of students for college or jobs upon completing high school. This Indicator reflects student graduation rates, disaggregated graduation rates for student subgroups (students eligible for Free/Reduced Lunch, minority students, students with disabilities, and English learners), dropout rates, and average Colorado ACT composite scores.

All averages are compared to baselines from the first year the performance framework reports were released (2009-10 for 1-year reports and 2008-10 for 3-year reports).

Colorado calculates "on-time" graduation as the percent of students who graduate from high school four years after entering ninth grade. A student is assigned a graduating class when they enter ninth grade, and the graduating class is assigned by adding four years to the year the student enters ninth grade. The formula anticipates, for example, that a student entering ninth grade in fall 2006 will graduate with the Class of 2010.

For the 1-year SPF, schools earn points based on the highest value among the following: 2010 4-year graduation rate, 2009 5-year graduation rate, 2008 6-year graduation rate and 2007 7-year graduation rate (the shaded cells in the first table above). For the 3-year SPF, schools earn points based on the highest value among the following: aggregated 2007, 2008, 2009 and 20104 -year graduation rate, aggregated 2007, 2008 and 20095 -year graduation rate, aggregated 2007 and 2008 6year graduation rate, or 2007 7-year graduation rate (the shaded cells in the second table above). For each of these rates, the aggregation is the result of adding the graduation totals for all available years and dividing by the sum of the graduation bases across all available years. For both 1-year and 3 -year SPFs, the "best of" graduation rate is bolded and italicized on the Performance Indicators detail page.
