

I've been orbiting in
circles forever...

Well ovals.

Say whaaaaaat.

Yhea ovals...

Bigger things have stronger gravity. so I was the one making you move. Because I am...HUGE!...! So i've been pulling you around. like you and the moon.

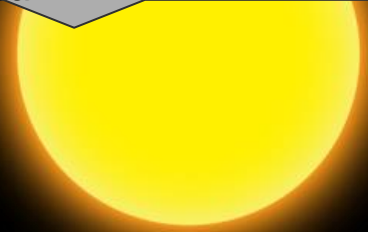

hi!

What about seasons?

Your ovular orbit makes it
so sometimes you're far
from me and sometimes
near

So when i'm closer
I'm hotter and
colder when
farther.
