This unit was authored by a team of Colorado educators. The template provided one example of unit design that enabled teacher-authors to organize possible learning experiences, resources, differentiation, and assessments. The unit is intended to support teachers, schools, and districts as they make their own local decisions around the best instructional plans and practices for all students.

- **Critical Thinking and Reasoning:** Thinking Deeply, Thinking Differently
- **Information Literacy:** Untangling the Web
- **Collaboration:** Working Together, Learning Together
- **Self-Direction:** Own Your Learning
- **Invention:** Creating Solutions

The Colorado Academic Standards for Music are not intended to be taught in a linear (checklist of coverage) fashion, but rather should be implemented as a cyclical creative process. Each unit within this sample blueprint intentionally includes standards from all four music standards to illustrate this process-based philosophy.

## Unit Description:
This unit is an exploration of music--singing, playing, and moving--through the storytelling process. Each student will get an opportunity to engage with understanding the mood and emotions related to a story and how musical sounds can be used to demonstrate mood and emotions. Across the unit, students will experiment with and perform musical representations of developmentally appropriate children’s stories. The unit culminates in asking the students to become a musical author and share musical stories in a final performance.

## Considerations:
This unit focuses on exploration and experimentation with music and how it conveys a story. Students should have a basic understanding of story structure (beginning, middle and end) and the mood and emotions related to a story. Students should also be encouraged to express their thought process for storytelling. Teachers may wish to consider the 1st grade drama unit, which explores the ways in which actors use movement, body language, and verbal communication within unique contexts to convey particular characters’ perspectives and relationships with other characters for integrative possibilities!

<tr>
<td>Stimulus Material: (Engaging scenario that includes role, audience, goal/outcome and explicitly connects the key generalization)</td>
<td>You are a group of “musical authors” who have been asked to share a musical story in a performance (informance or recording) with the young students in this school and/or community. To prepare to perform, you will work together to create a story (or retell a story) that will use musical sounds to convey emotions and moods. As experienced musical authors, you know that musical sounds may include vocal production (singing), small percussion, Orff barred instruments, etc., movement or some combination of these musical habits.</td>
</tr>
</tbody>
</table>
| Product/Evidence: (Expected product from students) | Students will compose and perform a musical representation of developmentally appropriate children’s stories (story). They will be able to verbally explain story elements through use of musical sounds. Performance options may include:  
  - Informance  
  - Performance and/or  
  - Recording  
 Evaluation criteria will include:  
  - Matching instrument choice/singing/movement to emotion  
  - Performance of emotion through musical means  
  - Verbally describing the instrument choice/singing/movement and chosen emotion. |

### Differentiation:
(Multiple modes for student expression)

Students may demonstrate understanding as a whole group, small group, or individual depending on time and ability in various ways:
- Singing/using their voice to demonstrate understanding of the use of music to convey feelings and stories.
- Moving their bodies to demonstrate understanding of the use of music to convey feelings and stories.
- Playing instruments to demonstrate understanding of the use of music to convey feelings and stories.
- A combination of singing, moving, and/or playing instruments to demonstrate understanding of the use of music to convey feelings and stories.
