CMAS Student Data File Field Definitions

Listed below is the file layout for the CMAS Student Data File and instructions for accessing the file. The district and school files are in .csv format. The first row of the file contains the headers; subsequent rows contain the data.

Student records do not have aggregate score information starting in field DC if a Not Tested or Void Code was applied to the record. For student records without Not Tested or Void Coding, the fields contain data appropriate for the particular subject and grade.

Note: The CMAS Science and CMAS Math/ELA/CSLA layouts are identical from the State Abbreviation field (A) to the Percentile Rank field (DF). Some fields may be filler in different files. Math, ELA, and CSLA fields start on page 15. Science fields start on page 19.

Exporting the Student Data File
