

Colorado Student - Centered Science Assessment 2024-2025 Learning Series TRANSFER TASKS

Transform your existing instructional materials to include an ideal assessment system focusing on **end of unit transfer tasks**. Figure out how to adapt NGSS assessments to be meaningful and coherent for your learners, useful for communicating progress, and manageable for you to provide actionable feedback.

- Design and implement an assessment system that drives student achievement and **informs instructional decision-making district-wide**.
- **Leverage your current instructional materials** to understand how learners use the 3 dimensions for sensemaking.
- Gain skills to create district-level common assessments that are **instructionally sensitive** and designed for 3-dimensional targets.
- Be part of a **collaborative community** dedicated to enhancing educational practices through innovative assessment systems.

Virtual Series

Sessions are 4:00PM-5:30PM
All Sessions will be Recorded
