Introduction

For almost eight years, Colorado Department of Education’s Colorado State Library (CSL), Colorado Parks and Wildlife (CPW), and libraries across Colorado have partnered to ensure Coloradans have access to their state parks. The resulting program, Check Out Colorado State Parks, provides participating Colorado libraries with materials for their community members to explore the outdoors, including a day pass to Colorado State Parks and a backpack that contains an exploration kit. Borrowers head into Colorado State Parks with binoculars, field guides for identifying flora and fauna, and fishing and outdoor activity guides. Every pack also includes a Leave No Trace card to encourage park visitors to learn about park stewardship and keep our parks free of debris. Anyone with a library card to a participating library can check out the backpack and Colorado State Parks pass for a week at a time. A total of 308 library locations from 158 library districts or systems in the state participate in the Check Out Colorado State Parks program. This includes 115 Colorado public library systems (e.g., county, municipal, and special library districts), 37 academic libraries, three military libraries, and three special libraries.

The Check Out Colorado State Parks pilot program ran from October 2015 to March 2016 with eight participating libraries. The success of the pilot led to an expansion of the program with 279 more libraries joining in 2016. Beginning in June 2016, CSL began collecting data and reporting on the program annually to library and partner stakeholders. Data on circulation of the pass and backpack are collected to gauge interest in the materials and calculate the savings provided to Coloradans. This program saves Coloradans around $69,980 annually, with only minimal costs to CPW and CSL. Additionally, libraries include surveys in the backpack to gain insight on patrons’ experiences, and discover how the backpacks were used. Borrowers are also asked to share thoughts about their experiences at the parks with an open-ended question. CSL has continued to gather borrower feedback through surveys over the last 7 years. Annually, CSL’s Library Research Service (LRS) creates an infographic of patron feedback and survey findings. These data and reports are shared with CPW, participating libraries, and other organizations interested in partnering with libraries. This report shares CSL’s findings from patron surveys completed from June 2016 to March 2023 and circulation data from 2016 through 2022. Surveys and infographics are available on the state library’s Check Out Colorado State Parks website at https://www.cde.state.co.us/cdelib/checkoutcostateparks as well as in the appendix B of this report.
About the Data

The survey that program participants filled out in 2016 asked about the participant’s park visit (when and where they went) as well as how likely they were to recommend a visit to a state park, buy a day pass, or buy an annual pass in the future based on their experience. It also asked participants whether they learned more about nature or learned more about what libraries have to offer because of this program. The current survey still asks these same questions, but in addition, asks what type of activities people participated in while at the park and their overall satisfaction with their experience (see appendix A for the full survey). There are 3,654 total survey responses compiled by CSL, and close to half of these surveys include the additional questions. Therefore, the aspects of this report that refer to the park activities that patrons participated in and their overall satisfaction include responses from about half the number of participants as the questions that have been asked consistently since 2016. In addition, beginning in 2023, the survey has been made available electronically and in print in both English and Spanish languages. To date, however, the survey has been available in both print and electronic formats only in English.

To gather more stories on this program’s impact, as well as count the number of times that Check Out Colorado backpacks circulated, CSL also administers an annual survey to participating Colorado libraries. Over the last seven years, on average, 71 libraries have responded to this survey each year. In 2022, 50 libraries responded which is less than a third of the total participating library systems. Because CSL was unable to gather an accurate estimate of total backpack circulation due to these low response rates, LRS also began asking public libraries how many times Check Out Colorado backpacks circulated on the Public Library Annual Report (PLAR) survey in 2021. For academic, military, and special libraries, CSL still depends on the annual Check Out Colorado library survey for this data. This change in reporting methods impacted the data because, for the last two years, public libraries have been required to report the number of times their backpacks circulated, giving CSL a more accurate (and higher) circulation count than was previously collected. Circulation totals impact estimates of program growth, reach, and cost savings. In future years, circulation totals for public libraries will continue to be collected in the PLAR.
The current total circulation count for the backpack and pass is approximately 43,468; however, it is likely that the actual total number of checkouts is higher since reporting Check Out Colorado backpack circulation was not mandatory for five years of the program and is still not mandatory for academic, military, and special libraries. Likewise, the 3,654 borrower survey responses do not represent the full borrower population. The borrower surveys collected and reported represent only around 8% of total backpack checkout experiences. Since completing the survey included in the backpack is optional, CSL’s data is from participants who self-select to take the survey. Borrower surveys are anonymous and no borrower data are tracked due to privacy protections at libraries, thus it is possible that individuals who have borrowed a backpack multiple times have submitted multiple surveys.

* Reporting public library circulation of program materials was not mandatory until 2021 when it was first included in the Public Library Annual Report survey.

**Aggregate totals may differ from annual reporting.
Check Out Colorado Program Growth

Backpack circulation for this program began with an average of 165 checkouts per week in 2016. After the initial excitement surrounding the program during its inaugural year, average backpack checkouts dropped slightly in 2017. In the following years they rose again and began to level off at an average of almost 150 backpack checkouts per week across the state until early 2020, just prior to the start of the COVID-19 pandemic.

Library services, including circulation of the backpacks, were interrupted by COVID-19 four years after the start of the Check Out Colorado State Parks program. In that time, libraries remained open with limited services, including pick-up/drop-off services for materials. During those limited services, the state library and CPW added a plastic pouch to the backpack kit to limit the potential exposure of borrowers and library workers to COVID-19 and for ease of handling in processing at library locations. While overall library visits and circulation of materials (including circulation of the state park passes and backpacks) decreased compared to previous years and historical trends, some circulation of the program materials continued during this time.

Since the sharp drop off in backpack checkouts in 2020, however, circulation numbers have risen rapidly, even lately exceeding pre-pandemic levels. Prior to the pandemic, the number of backpack checkouts per week was 148.5 on average, but closures and travel advisories due to the pandemic dropped the average number of backpack checkouts per week to 29 in 2020. That is an 80.5% decrease in backpack checkouts. The number of backpack checkouts per week during 2021 was back up to 133. That is only a 10% decrease from pre-pandemic numbers and a 359% increase from 2020. In 2022, the number of recorded backpack checkouts was higher than any other year since the program began at an average of more than 168 checkouts per week.

The number of libraries participating in the program from 2016 to 2023 has also increased. After the trial, the program kicked off with 287 participating library locations. Now, there are 308 participating library locations. The addition of 21 library locations over the last 7 years, alongside increasing circulation counts, indicates that everyone involved in this program sees benefits from participating.
Program Satisfaction

Of the 1,744 participants that answered the question, “Overall, how satisfied were you with your Check Out Colorado State Parks experience?” (with the answer options: very satisfied, somewhat satisfied, neutral, somewhat unsatisfied, and very unsatisfied) 98% of participants indicated that they were either very satisfied or somewhat satisfied, and out of all the responses to this question, 93% were very satisfied. Only 1% of survey takers indicated that they were unsatisfied with the program. Within the 1% of those rating their experiences as unsatisfying, responses to the open-ended question included positive comments about the program or explanations that their low rating reflected an experience at the park (e.g., rules or conditions at the time of their visit) rather than with the program itself.

In response to the survey’s reflective, open-ended question, “Do you have a story? Please share with us how this experience helped you discover and learn at a Colorado state park” the most common suggestion was to make the check out period for the backpack longer than one week. Due to the limited supply of passes, oftentimes participants need to place the backpack on hold and wait for it to be available. Likewise, due to the travel necessary to reach state parks, weather, and other unavoidable circumstances, there are instances when the patrons wait for their pack, only to receive the pass during a week when they are unable to visit a state park. However, with the limited supply of passes, lengthening the check out period would also mean patrons on hold for the backpack need to wait even longer to receive it.

It is worth noting that the feedback received regarding the number of passes at library locations as well as the circulation statistics have led CPW to increase the quantity of passes distributed to some library locations. CPW remains committed to expanding access to library users to state parks and works with the state library to review annual circulation statistics and borrower program satisfaction. In addition, library partners are consulted for feedback on the program from the library point of view.

Answers to the survey question, “Based on your experience with Colorado State Parks, how likely are you to recommend a visit to a state park?” indicated overall satisfaction with their parks experience. Each year at least 97% of survey respondents have said that they are likely to recommend a visit to a state park, and for the past six years, at least 98% of respondents have said they are likely to recommend a visit to a state park.
Program Satisfaction Cont.

These responses, along with the stories shared at the end of the survey, overwhelmingly express positive feelings towards state parks. However, positive experiences at the parks and/or with the library program do not necessarily correlate with an interest in or ability to purchase park passes for continued access to Colorado State Parks. In response to the question, “Based on your experience with Colorado State Parks, how likely are you to buy a day pass to visit a state park?” more than three out of four survey respondents (79%) said that they were likely to buy a day pass. In response to the same question, though regarding an annual pass, the number of people that said they are likely to buy an annual pass dropped 22 percentage points to 57%. Several respondents shared that they bought a state parks pass because of their experience with the Check Out Colorado program, but around four times as many survey respondents spoke of the financial help that this program provides or shared that they would not have visited a state park if it were not for this program. State park day passes cost $10.00 per vehicle, and the median number of annual checkouts for this program is 6,980. Therefore, this program saves Coloradans around $69,980 annually. These savings increase if program participants decide to use the pass multiple days during the week that they have it checked out. CPW does not sell weekly passes, so the existence of a week-long Colorado State Parks pass is unique to this partnership. The cost to the state partners (CPW and CSL) is minimal and consists of the initial upfront cost for pack materials, such as binoculars and field guides, as well as annual printing and postage.

These findings indicate that this library program often reaches people who would not otherwise be willing and/or able to visit a state park. The cost of the park pass and/or the process by which passes are purchased are barriers to entry, and the Check Out Colorado State Parks program reduces these barriers to outdoor access at state parks. Appreciation and gratitude are the most prevalent themes expressed in the survey’s open-ended responses, with “thank you” being the most common written response. By partnering with libraries through the state library in the Check Out Colorado State Parks program CPW’s goal is to expand access to parks. The data related to this series of questions has been key, not only to the continued partnership with libraries, but also in CPW’s decision to explore alternative pass types and costs as they seek to reduce barriers to parks and invite more park visitors, particularly those from historically underserved populations including visitors for whom cost is a primary barrier.
Participation Across Colorado and Beyond

The Check Out Colorado State Parks program has a statewide reach. Colorado libraries serve communities within all regions and areas in the state whether or not they are near state parks. The survey has been filled out by respondents from 311 different Colorado zip codes since 2016. Due to the density of population in the Front Range region of the state, the heaviest usage of the program is throughout that area. However, less densely populated areas of Colorado—such as Walsenberg, Glenwood Springs, and Hotchkiss—have returned many Check Out Colorado State Parks surveys, which indicates high participation in these areas as well. Variables including the proximity of participating libraries to state parks, the residents’ ages and activity levels, and local library advertisement of the program may contribute to circulation differences among Colorado libraries. Overall, the range of locations from which CSL has received surveys illustrates that Check Out Colorado has reached people across all regions of Colorado.

CSL has also received survey responses from visitors to the state, including 50 travelers from 44 non-Colorado zip codes. Colorado’s State Parks saw visitors from across the country through the Check Out Colorado program, with people from Massachusetts to Washington filling out the survey. Many responses to the question “Do you have a story?” recount borrowers taking friends or family visiting from out of state to Colorado’s State Parks. Borrowers also included recent transplants and new Colorado residents who welcomed the program as a great way to learn about what Colorado has to offer.

All but one of Colorado’s State Parks have been visited by survey respondents. The exception, Lone Mesa State Park, limits public access and requires an additional permit to visit. With that exception, all Colorado State Parks have gained visitors because of this program.
Engagement with the Outdoors

Since 2018, participants have been asked which activities they participated in during their park visits. Of the 1,721 survey respondents who answered this question, 69% participated in trail/road activities, 30% participated in water-based activities, 35% participated in wildlife-related activities, 35% selected “other” and only 2% participated in winter activities. Over half (52%) indicated that they participated in two or more of these activities at the park. There is, however, far more to do at parks than the options provided on the survey. Write-in responses by those that selected “other” include climbing, conservation projects, geocaching, picnicking, and attending ranger programs. Overall, around 150 unique activities were shared from people who wrote in their activity. Fishing and camping were the activities written most often, with 11% of respondents sharing that they went fishing.

Check Out Colorado State Parks gives participants the opportunity to uncover the benefits of outdoor recreation such as learning, health and fitness, relaxation, or bonding with family and friends. Throughout the surveys, respondents wrote about opportunities to connect with family and positive impacts on their mental health. One survey respondent described their visit as a “renewal of spirit and soul” and another wrote, “State park day trips are perfect for our family to connect and break free from day-to-day stress.” Spending time with family and connecting with the company that visitors enjoyed the park with were some of the most frequently occurring themes throughout the stories shared.

Accessibility

The accessibility of their parks is an important focus for Colorado Parks and Wildlife. Increasing access for disabled visitors is one of their goals which is evident in the state parks. There are many outdoor spaces and public lands in Colorado without entry fees, but the state parks make certain efforts to expand access to seniors, persons with mobility restrictions and those with disabilities. Staunton State Park, Barr Lake, and others have track-chairs that can be used to access some of the park trails for users of wheelchairs or mobility devices whose vehicles and devices are otherwise not suited for use on trails. The track chair program was mentioned in Check Out Colorado participant surveys. Additionally, several respondents observed and noted adaptive trails and facilities at other state parks. One visitor wrote, “We love the outdoors and state parks. We are grateful Sweitzer has handicapped [sic] facilities and will plan to visit again”. A visitor to Stagecoach State Park wrote, “It was the perfect trail for someone who is ambulatorily challenged.”
Accessibility Cont.

Natural areas without entry fees are not often set up with adaptive trails and facilities for people with physical disabilities, so state parks play an important role in serving this community. Beyond reducing financial barriers to parks, the Check Out Colorado program reduces physical obstacles to the outdoors as well by connecting disabled library visitors and their families to accessible outdoor spaces, making Colorado’s beautiful, wild places even more accessible.

Learning About Libraries

Check Out Colorado State Parks has helped people learn more about their libraries. Even community members who have long supported and loved their libraries are often unaware of the variety of items libraries circulate and the access their library cards can provide to places far beyond the library building walls. Overall, 95% of survey respondents agreed to the statement, “The Check Out Colorado State Parks program changed my view about what libraries have to offer.” Many people were pleasantly surprised to find out that access to Colorado State Parks is something that can be offered by libraries.

The parks pass and backpack program, then, has served as a way to educate community members about library services and resources more broadly. Not only do libraries have books—which they already knew—libraries also provide access to other interesting experiences in their communities. Libraries can provide makerspaces where people can build missing parts of appliances in their homes or innovate gadgets and toys. People can take telemedicine appointments in library study rooms and connect with the healthcare providers on devices they borrow from the library while using the library’s wifi to connect to the internet. Libraries hold programs in auditoriums, on their patios, and at parks, community centers or coffee shops. Of course, though, not everyone needed the Check Out Colorado State Parks program to clue them in. Some people responded that they already knew what libraries have to offer. One respondent wrote, “We are already regular beneficiaries of the awesome services provided by libraries and were delighted to spread the news of this resource.”
Learning From Nature

Each year since this program began at least four out of every five people have said that their Check Out Colorado State Parks experience helped them learn more about nature. This is significant because program participants are not necessarily visiting a state park to attend a formal educational program. Even if there was not a facilitated learning activity taking place, participants still agreed or strongly agreed with the statement, “This park experience helped me/us to learn more about nature.” Just being immersed in nature was often enough for participants to say that they learned something about it. For many, their visit was not their first time at a state park. Only 9% of respondents said that this was their first visit to a state park, yet 83% reported learning something during their park experience. This suggests that people are likely to continue learning something new on each park visit even after their first.

The materials included in the Check Out Colorado backpack were also mentioned in many survey responses. The binoculars and the plant and wildlife identification guides were brought up most often in survey respondents’ comments. The binoculars were regularly enjoyed by both children and wildlife watchers, and respondents shared how helpful the identification guides were in learning more about the natural world around them. CPW hopes to foster stewardship among visitors to state parks through education and engagement such as wildlife observation, tree and flower identification, and exposure to the interconnectedness of our ecosystems. Survey findings suggest that the materials included in the Check Out Colorado backpack field exploration kit support this goal. Expanding the kit to include materials like stargazing, fishing, and other activity guides has also helped promote engagement with parks’ facilities and programs. In addition to learning about nature, respondents also shared stories about learning new skills such as archery or kayaking.
Conclusion

The Check Out Colorado State Parks program is a model for potential partnerships between libraries and organizations and agencies hoping to expand access to their services and resources. Colorado State Library (CSL) has served as an invaluable partner to Colorado Parks and Wildlife (CPW) in reaching potential park visitors and creating stewards of our state’s outdoors and wildlife. Libraries are anchor institutions with a statewide coverage area that invite visitors from all areas of the state and all types of communities, at all income levels, from all walks of life, with various interests, levels of experience and knowledge of the outdoors, and ranges of abilities and access. Providing access to no-cost park entry and a field exploration kit reduces obstacles that keep many Coloradans from visiting state parks.

Because of this program, Colorado Parks and Wildlife receives visitors to its state parks that would not otherwise explore these amazing natural areas. Colorado residents and visitors gain access to spaces and experiences that foster physical, emotional, and social wellness. In their own words, borrowers describe how visiting the parks with their Check Out Colorado pass and backpack is not only fun, but also relieves stress, helps them strengthen relationships, and teaches them something new and interesting. Check Out Colorado State Parks eliminates the financial barrier of purchasing a day pass and helps people understand all that libraries can offer to their communities. Even after COVID-19 disrupted services, this program bounced back stronger than ever. After collecting seven years’ worth of data on this program, there have been very few complaints, which shows that there are virtually no negative consequences of this program—a program which has saved Coloradans around $489,860 over the past seven years.

In fact, Colorado’s Check Out Colorado State Parks program has inspired similar programs across the nation, and starting in 2023, Colorado residents will have the option to purchase a discounted state parks pass along with their vehicle registration. Regardless of this change, Colorado State Library will continue to partner with Colorado Parks and Wildlife to offer the Check Out Colorado State Parks backpacks.
Once community members expand their view of library resources beyond just books, they are more likely to seek out and find other benefits provided by their library. Colorado libraries’ partnership with Colorado Parks and Wildlife is just one example of the many unique partnerships libraries can form to better serve their community. Libraries are becoming community hubs that connect community members to the organizations and agencies that serve them. Libraries are places to read, learn, and rest. Libraries have books on the shelves, but they also provide programming for all ages and boundless opportunities to learn and grow. Some community members already know this but many don’t. Libraries are spreading the word that they are more than just quiet reading spaces, and the Check Out Colorado State Parks program is helping them do that.
Appendix A: Surveys

Check Out Colorado State Parks

If you were able to use the state parks pass during the time you checked it out, please take a minute to share your opinions with us about your experience. Your feedback will help us sustain and improve the program! You may also take this survey online at: tinyurl.com/CheckOutCSP.

State park(s) visited: ___________________________ Date(s): ___________________________

1. Was this your first visit to a Colorado state park? □ Yes □ No

2. Did you participate in any of the following activities during your visit? (Please check all that apply.)
   □ Trail/road activities (e.g., hiking, mountain biking) □ Water-based activities (e.g., swimming, canoeing)
   □ Winter activities (e.g., snowshoeing, skiing) □ Wildlife-related activities (e.g., birdwatching)
   □ Other (please describe): __________________________________________________________

3. Overall, how satisfied were you with your Check Out Colorado State Parks experience?

Check Out Colorado State Parks

Check Out Colorado State Parks (cpw.state.co.us/librarybackpack), the result of a partnership between Colorado Parks and Wildlife and the Colorado State Library, provides 287 Colorado libraries with two park passes and adventure backpacks filled with information and educational activities. Patrons of participating public, military, and academic libraries can check out a backpack for a week at a time to visit state parks for free. Between June and November 2016, 720 patrons completed a survey about their experience with the program:

**Patrons recommend visiting a park and are likely to buy a pass**

**Based on your experience with Check Out Colorado State Parks, how likely are you to:**

- Recommend a visit to a state park. **97% likely**
- Buy a day pass to visit a state park. **77% likely**
- Buy an annual pass to state parks. **54% likely**

**Patrons learned about nature, state parks, and libraries**

The Check Out Colorado State Parks program changed my view about what libraries have to offer:

- **94% agree**

We didn’t know anything about the kids programs some of the state parks offer. We are new to USA. I’m looking forward to the education programs about wild animals. My kids will love it, and so will I. **So important to know these things.**

- **85% agree**

We got to walk the trails and tried to identify as many wildlife as we could, also it was nice for a single mom to be able to enjoy outdoor fun with the kids.

- **54% agree**

It was a family excursion to the great outdoors, yet still close to home. The information provided in the backpacks, along with the binoculars excited the younger children. They were able to pick out a bald eagle and zoom in on it, there were smiles all around.

**This park experience helped us learn more about nature:**

Appendix B: Annual Report 2017

Check Out Colorado State Parks 2017

Check Out Colorado State Parks (cpw.state.co.us/library/backpack), the result of a partnership between Colorado Parks and Wildlife and the Colorado State Library, provides 297 Colorado libraries with two park passes and adventure backpacks filled with information and educational activities. Patrons of participating public, military, and academic libraries can check out a backpack for a week at a time to visit state parks for free. In 2017, 806 patrons completed a survey about their experience with the program:

Patrons recommend visiting a park and are likely to buy a pass

Thank you for this wonderful backpack of information and goodies. My husband and I loved learning and experiencing our closest state park. Now we will buy a pass and travel to other state parks. This pack is a fabulous tool to get people out in our beautiful natural surroundings!

I would definitely use a parks pass often, but $70/year is outside of my budget. I’m thankful the library has things like this and the adventure pass to help me enjoy CO anyway. I tell people about these programs all the time!

We had forgotten [what] a lovely park Lathrop is, and had not bothered to take the 12 mile car trip there to hike. We will be buying an annual pass and visiting a lot this year. Thank you, Colorado Parks & La Veta Library.

Patrons learned about nature, state parks, and libraries

- This park experience helped us learn more about nature: 83% agree

My son loves to explore. I am trying to foster that with both him and my daughter. We used the guides for trees and shrubs and for animals to identify many things we saw. It was fun to watch the wonder in their eyes.

I really appreciated having the pass from the library...We shared the fact that we checked out the pass & other items in the backpack with a couple we met on the gondola. They were astonished this was available & eager to ask Denver libraries about the backpack.

Thank you for this great opportunity! We feel that this is a wonderful program to acquaint people with [what] state parks and libraries have to offer. We found the booklets extremely helpful and our grandchildren especially loved identifying species of birds, wildlife and plants with the binoculars. We would really like to explore parks further from our home. We are saving to purchase an annual pass.

- 82% agree

This State Park [Yampa Valley] hit the mark on activities! We did a “first-ever” river float with the park rangers. The flower/tree identification guide, along with the wildlife one, were so fun to find in the library backpack, we used them!

Loved being able to teach my daughter and show her what CO State Parks have to offer. Great program!

[We] learned that the parks are treasures and that we can be thankful to the entities that preserve and take care of them for our enjoyment and well-being.

This backpack is a great benefit to our community. Please keep it up!

We are thankful the library has this program—we wouldn’t be able to go otherwise. Thank you!

**The Check Out Colorado State Parks program changed my view about what libraries have to offer:**

- 95% agree

It’s a great way for people to have a chance to go to a state park that otherwise might not be able to afford it. Thank you for having this program. It’s also a great way for folks to discover just how much your local library has to offer.

There were approximately 7,630 backpack checkouts in 1 year. That’s 147 checkouts per week!
Check Out Colorado State Parks 2019

Check Out Colorado State Parks (cpw.state.co.us/librarybackpack), the result of a partnership between Colorado Parks and Wildlife and the Colorado State Library, provides 297 Colorado libraries with two park passes and adventure backpacks filled with information and educational activities. Patrons of participating public, military, and academic libraries can check out a backpack for a week at a time to visit state parks for free. In 2019, 371 patrons completed a survey about their experience with the program:

Based on their experience with Check Out Colorado State Parks, patrons are likely to:

- Recommend a visit to a state park. 99%
- Buy a day pass to visit a state park. 79%
- Buy an annual pass to state parks. 57%

Patrons learned about nature, state parks, and libraries:

- This park experience helped us learn more about nature: 86% agree
- The Check Out Colorado State Parks program changed my view about what libraries have to offer: 94% agree
- Up close viewing of turkey vultures at Castlewood Canyon was a first & an amazing experience for my daughter and I.
- Castlewood Canyon State Park is a place we've always driven past and wondered about. We were so glad to finally explore it, and hope to go back.
- Tiger salamander larvae are fascinating! The lost pond in Mueller State Park was full of them and we spent a long time watching them. They are such interesting looking creatures and none of us had ever seen anything like them in the wild before.
- We learned things about the bald and golden eagles we did not know. We appreciated the opportunity to access our State Parks via the SP Backpack Program and had no idea this existed through the library system. Thank you!
- We are seniors on a fixed income. This pass was wonderful to allow us to visit this park and its trails! Thanks! A great experience. Thanks for contributing to us in a special way!
- We purchased a pass!

There were approximately 7,692 backpack checkouts in 1 year. That’s 148 checkouts per week!
Appendix B: Annual Report 2020

Check Out Colorado State Parks 2020

Check Out Colorado State Parks (cpw.state.co.us/librarybackpack), the result of a partnership between Colorado Parks and Wildlife and the Colorado State Library, provides 297 Colorado libraries with two park passes and adventure backpacks filled with information and educational activities. Patrons of participating public, military, and academic libraries can check out a backpack for a week at a time to visit state parks for free. In 2020, state parks were closed from March 26 until May 12, when a gradual reopening of campgrounds began. However, people were still urged to avoid unnecessary travel for much of the year. Due to the extreme nature of the 2020 pandemic, many libraries were closed for a portion of the year or offering limited services. Only 137 patrons completed a survey about their park experience.

Based on their experience with Check Out Colorado State Parks, patrons are likely to:

- Recommend a visit to a state park. 99%
- Buy a day pass to visit a state park. 78%
- Buy an annual pass to state parks. 53%

Patrons learned about nature, state parks, and libraries:
