

Advisory Program Description

Name of Entity: Orton Gillingham International
Contact Information: Elenn Steinberg, elenn@OrtonGillinghamInternational.org , 720-937-8242
Type of Program: Choose an item.
If this program is intervention or supplemental which component(s) of reading are addressed: <input checked="" type="checkbox"/> Phonemic Awareness <input checked="" type="checkbox"/> Phonics <input checked="" type="checkbox"/> Fluency <input checked="" type="checkbox"/> Vocabulary <input checked="" type="checkbox"/> Comprehension
Grade Level: Choose an item.
Summary of the program: Orton-Gillingham International (OGI) offers literacy and numeracy training and consulting to educational professionals. Our focus is on the effective implantation of data driven, Yoshimoto Orton-Gillingham (YOG-I) approach in whole classroom, small group, and one-to-one settings. Upon completing our courses, participants will have acquired the skills and received the essential materials necessary to fully implement this data-driven solution for teaching reading to all students including those who are the most challenged, ELL, and dyslexic. By providing the highest quality, best practice instruction, motivation and support to educators, OGI insures that they will be empowered to effectively teach all students the necessary literacy and numeracy skills to become successful. Our consulting services support ongoing skills and provide teachers and building leaders with deeper knowledge and coaching to ensure continued growth for all students.
The instructional approach is data driven and effective outcomes of our services are documented. Past participants have testified that by implementing the Yoshimoto method with fidelity, they are able to demonstrate consistent and significant growth. This data has been documented in multiple school settings.

NOTE: We use the following descriptions to define various types of instructional support in early literacy. Please review the descriptions and identify your program according to the type of instructional support is it intended to deliver. *Each approved instructional program should classify itself under one type of instructional programming only.*

Core Instruction is instruction provided to all students in the class, and it is usually guided by a comprehensive core reading program. Part of the core instruction is usually provided to the class as a whole, and part is provided during the small group, differentiated instruction period. Although instruction is differentiated by student need during the small group period, materials and lesson procedures from the core program can frequently be used to provide reteaching, or additional teaching to students according to their needs.

Supplemental Instruction is instruction that goes beyond that provided by the comprehensive core program because the core program does not provide enough instruction or practice in a key area to meet the needs of the students in a particular classroom or school. For example, teachers in a school may observe that their comprehensive core program does not provide enough instruction in vocabulary, or in phonics, to adequately meet the needs of the majority of their students. They could then select a supplemental program in these areas to strengthen the initial instruction and practice provided to all students.

Intervention Instruction is provided only to students who are lagging behind their classmates in the development of critical reading skills. This instruction will usually be guided by a specific intervention program that focuses on one or more of the key areas of reading development. This type of instruction is needed by only a relatively small minority of students in a class. In some cases, students in 2nd and 3rd

Advisory Program Description

grade may have lagged so far behind grade level development of reading skills that very little content from the grade level comprehensive core program is suitable for them. In these cases, students may need to receive instruction guided by a comprehensive intervention program that is specifically designed to meet their specific needs while at the same time accelerating their growth toward grade level reading ability.
