

Cross LEA Validation – Warning SE701 Instructions

The students listed have a previously recorded exit code in your district which indicates that they either dropped out (40), were expelled (50), or transferred to a GED program(70) in a prior school year and subsequently began attending school in a different Colorado school district during the current school year.

As of the 2015-16 collection year, this Warning no longer requires an adjustment. Students that have been recovered by another district will no longer be included in the prior districts graduation cohort base as part of the graduation rate calculation. The warning is now provided only for district records as a list of students from prior cohorts who have now been removed.
