	<p>ANet has developed innovative virtual learning offerings to support schools and systems during the COVID-19 pandemic. Since school closures this spring, we have facilitated over 1,000 virtual learning sessions for our partners nationwide. Our team of professional development experts have done extensive research on not only the best practices for adult learning, but also the critical components of high-quality virtual learning.</p> <p>ANet typically uses Zoom to facilitate professional development and coaching, including breakout sessions, polls, and the chat to ensure participants are engaged. However, we can also deliver virtual professional development and coaching via the platform of the district's choosing. For example, we have facilitated professional development through Microsoft Teams.</p>
