This unit was authored by a team of Colorado educators. The template provided one example of unit design that enabled teacher-authors to organize possible learning experiences, resources, differentiation, and assessments. The unit is intended to support teachers, schools, and districts as they make their own local decisions around the best instructional plans and practices for all students.

| **Generalizations** | **My students will Understand that...**  
|-------------------|---------------------------------------------------------------|

An organism’s (plants, animals and humans) wellness and survival depends on its environment, habitat, choices and habits. (SC09-GR.2-S.2-GLE.1-EO.c; RA.1) (CH09-GR.2-S.2-GLE.1-EO.a,b,c; RA.2)

- What are the characteristics of a healthy environment? (SC09-GR.2-S.2-GLE.1; RA.1)
- What habits have positive consequences? (CH09-GR.2-S.2-GLE.1-EO. a,c,d)
- What habits have negative consequences? (CH09-GR.2-S.2-GLE.1-EO.a,c,d)
- What makes a habitat suitable for a specific organism? (CH09-GR.2-S.2-GLE.1-EO.a,c,d)

The structure and function of body systems depend on an organism’s behavior in relation to food and water consumption. (SC09-GR.2-S.2-GLE.2-EO.b) (CH09-GR.2-S.2-GLE.1-EO.a,b;RA. 1,2)

- What body systems require water to function? (CH09-GR.2-S.2-GLE.1-EO.a,b;RA. 1,2)
- How do body systems use water? (CH09-GR.2-S.2-GLE.1-EO.a,b;RA. 1,2)
- What food choices are good for body systems? CH09-GR.2-S.2-GLE.1-EO.a,b;RA. 1,2
- What are the advantages of an animal or plant having a specific structure? (SC09-GR.2-S.2-GLE.2-EO.b)
- What are the basic needs of plants and animals? (SC09-GR.2-S.2-GLE.1;IQ.1)

| **Guiding Questions** | **Factual** | **Conceptual** |
|-----------------------|---------------------------------------------------------------|
| How do organisms interact in a habitat to create a healthy environment? (SC09-GR.2-S.2-GLE.1; N.1) | What are the characteristics of a healthy environment? (SC09-GR.2-S.2-GLE.1; RA.1) | How do you know when your body needs the most water? (CH09-GR.2-S.2-GLE.1-EO.a,b;RA. 1,2) |
| How do habits impact your health? (CH09-GR.2-S.2-GLE.1-EO. a,c,d) | What habits have positive consequences? (CH09-GR.2-S.2-GLE.1-EO. a,c,d) | Why do food choices impact our body? (CH09-GR.2-S.2-GLE.1-EO.a,b;RA. 1,2) |
| How are the habitats of two organisms similar and different? (SC09-GR.2-S.2-GLE.1-EO.c; RA.1) | What habits have negative consequences? (CH09-GR.2-S.2-GLE.1-EO.a,c,d) | How are the behaviors of a plant and an animal similar and different? |
| What different structures do plants and animals have that perform the same functions? (For example what different structures do plants and animals have to get water?) (CH09-GR.2-S.2-GLE.1-EO.a,b;RA. 1,2) | What makes a habitat suitable for a specific organism? (CH09-GR.2-S.2-GLE.1-EO.a,c,d) | What different structures do plants and animals have to get water? |

2nd Grade, Integrated Science/Health  
Unit Title: Plants and Animals in Habitats/ Lifelong Healthy Eating  
Page 2 of 18
| The consumption of a variety of foods can impact an organism’s energy and overall health. (CH09-GR.2-S.2-GLE.1- EO.a) (SC09-GR.2-S.2-GLE.1-EO.b) | What foods make us healthy? (CH09-GR.2-S.2-GLE.1-EO.a) What foods give us more energy? (CH09-GR.2-S.2-GLE.1-EO.a) Why do certain foods give us more energy than others? (CH09-GR.2-S.2-GLE.1-EO.a) What living (biotic) components of an organism’s environment impact its overall health? (SC09-GR.2-S.2-GLE.1-EO.b) | How does food impact your learning and behavior? Which foods give you the most energy? How does eating chips and candy everyday affect your body? How can non-living (abiotic) components of an organism’s environment impact its overall health? |

| An organism’s behavior, such as awareness of body signals, enhances its ability to function better. (CH09-GR.2-S.2-GLE.1-EO.c,d,e) (SC09-GR.2-S.2-GLE.2-EO.b) | What the advantages of an animal or plant having a specific behavior? (SC09-GR.2-S.2-GLE.2-EO.b) What are body signals? (CH09-GR.2-S.2-GLE.1-EO.c,d,e) | Why is the behavior of plants and animals important? How can being unaware of body signals affect your health? |
### Critical Content:

**My students will Know...**

- How organisms depend on their habitat. (SC09-GR.2-S.2-GLE.1-EO.a)
- The non-living components of a habitat (SC09-GR.2-S.2-GLE.1-EO.b)
- Why an organism can survive in its habitat (SC09-GR.2-S.2-GLE.1-EO.c)
- Living things depend on the health of their habitats (SC09-GR.2-S.2-GLE.1; RA.1)
- Different organisms have different needs (SC09-GR.2-S.2-GLE.1; RA.2)
- Why a habitat is suitable for a specific organism (SC09-GR.2-S.2-GLE.2-EO.a)
- Why a habitat is not suitable for a specific organism (SC09-GR.2-S.2-GLE.2-EO.a)
- The structures of a population that help that population survive (SC09-GR.2-S.2-GLE.2-EO.b)
- The behaviors of a population that help that population survive (SC09-GR.2-S.2-GLE.2-EO.b)
- The benefits of healthy food and beverage choices (CH09-GR.2-S.2-GLE.1-EO.a;RA-2;N.1)
- The benefits of daily breakfast and water intake (CH09-GR.2-S.2-GLE.1-EO.a,c;IQ.1;RA.1,2) – Example: prevents dehydration and helps the brain to be more alert.
- The body signals of being full or hungry (CH09-GR.2-S.2-GLE.1-EO.e;IQ.2) Example: A person may have a low level of energy when hungry.

### Key Skills:

**My students will be able to (Do)...**

- Use evidence to develop a scientific explanation about how organisms depend on their habitat (SC09-GR.2-S.2-GLE.1-EO.a)
- Analyze and interpret data about non-living components of a habitat (SC09-GR.2-S.2-GLE.1-EO.b)
- Assess and provide feedback on other scientific explanations regarding why an organism can survive in its habitat (SC09-GR.2-S.2-GLE.1-EO.c)
- Use instruments to make observations about habitat components - for example, data can be collected from a fish tank to assess the environmental health (pH). (SC09-GR.2-S.2-GLE.1-EO.d)
- Identify the different organisms and their needs
- Describe different ways that scientists seek to understand about organisms and their interactions with their environment (SC09-GR.2-S.2-GLE.1; N.1)
- Collaborate with other students in developing a scientific explanation about how organisms depend on their habitat (SC09-GR.2-S.2-GLE.1; N.2)
- Use evidence to develop an explanation as to why a habitat is suitable for a specific organism (SC09-GR.2-S.2-GLE.2-EO.a)
- Use evidence to develop an explanation as to why a habitat is not suitable for a specific organism (SC09-GR.2-S.2-GLE.2-EO.a)
- Analyze and interpret data about structures of a population that help that population survive (SC09-GR.2-S.2-GLE.2-EO.b)
- Analyze and interpret data about behaviors of a population that help that population survive (SC09-GR.2-S.2-GLE.2-EO.b)
- Choose healthy food and beverages (CH09-GR.2-S.2-GLE.1-EO.a,b,c;IQ.1;RA.1,2;N.1)
- Choose a variety of healthy snacks (CH09-GR.2-S.2-GLE.1-EO.a,d;RA.2;N.1)
- Recognize when they are full or hungry (CH09-GR.2-S.2-GLE.1-EO.e;IQ.2)
- Identify healthy foods and beverages (CH09-GR.2-S.2-GLE.1-EO.a,d;N.1)
**Critical Language:** includes the Academic and Technical vocabulary, semantics, and discourse which are particular to and necessary for accessing a given discipline.  
**EXAMPLE:** A student in Language Arts can demonstrate the ability to apply and comprehend critical language through the following statement: “Mark Twain exposes the hypocrisy of slavery through the use of satire.”

<table>
<thead>
<tr>
<th>A student in ______________ can demonstrate the ability to apply and comprehend critical language through the following statement(s):</th>
</tr>
</thead>
<tbody>
<tr>
<td>I use evidence from my observations to tell how organisms depend on where they live.</td>
</tr>
<tr>
<td>Organisms need a healthy environment to survive.</td>
</tr>
<tr>
<td>I use data to explain the environmental health of a habitat.</td>
</tr>
<tr>
<td>A habitat is suitable for a specific organism if its resources help the population survive.</td>
</tr>
<tr>
<td>A habitat is not suitable for a specific organism if its resources do not help the population survive.</td>
</tr>
<tr>
<td>A population’s body structure helps them survive.</td>
</tr>
<tr>
<td>Johnny will be able to identify the benefits of and engage in lifelong healthy eating habits by maintaining a balanced diet.</td>
</tr>
</tbody>
</table>

**Academic Vocabulary:**  
Scientific Explanation, Data, Evidence, Interpret, Analyze, Assess, Collaborate, Observation, Feedback, Habit, Healthy, Explain, Describe, Identify, Benefits, Consequences, Awareness, Consumption, Choices

**Technical Vocabulary:**  
Organisms, Habitat, Living Components, Non-Living Components, Environmental Health, Basic Need, Structures, Behaviors, Survive, Organism, Advantages, Unique, Population, Functions, Environment, Resources, Suitable, Body Signals, Balanced Diet, Energy
This unit explores structures and functions of organisms based on their environment. Students will begin to understand how structures and functions of an organism help it survive within its environment. Students will learn these concepts through exploring different organisms, habitats, and the foods organisms and humans eat to stay healthy. The unit concludes with students creating a comparison model that describes an organism and human habitat, its environment surroundings, and food choices that help it to survive.

**Unit Generalizations**

**Key Generalization(s):** An organism’s (plants, animals and humans) wellness and survival depends on its environment, habitat, choices and habits.

**Supporting Generalizations:**
- The structure and function of body systems depend on an organism’s behavior in relation to food and water consumption.
- The consumption of a variety of foods can impact an organism’s energy and overall health.
- An organism’s behavior, such as awareness of body signals, enhances its ability to function better.

**Considerations:** Teachers could use a variety of different models for this unit. Models can be drawings, illustrations, 3D, as well as any alternative way of organizing concepts.

---

**Performance Assessment:** *The capstone/summative assessment for this unit.*

**Integration Continuum Color:** GREEN BLUE PINK YELLOW

Yellow: Peripheral affective goals are met through the work. Learning is demonstrated in one discipline or the other, but not both.

**Claims:**
(Key generalization(s) to be mastered and demonstrated through the capstone assessment.)

An organism’s (plants, animals and humans) wellness and survival depends on its environment, habitat, choices and habits.

**Stimulus Material:**
(Engaging scenario that includes role, audience, goal/outcome and explicitly connects the key generalization)

You will become a museum curator and will design a comparison model of an organism’s habitat and how it survives with that of a human’s habitat.
### Product/Evidence:
(Expected product from students)

Within the model students must show the following:
- Living and non-living features, environmental surroundings of the habitat, and food choices that help the organism and human survive.
- 4 choices (e.g. meat, vegetables, fruits, water, and sunlight) typically found in the environment for the organism and healthy choices for the human.

### Differentiation:
(Multiple modes for student expression)

Students may:
- Write one sentence for the organism’s habitat and healthy food and beverage choices
- Verbally communicate the organism's habitat and healthy food and beverage choices
- Develop a multimedia presentation
- Create an artistic representation
- Create a menu for more than one environment
- Work in groups or with a partner

### Texts for independent reading or for class read aloud to support the content

| **2. Description:** | Think / work like a health advocate to identify appropriate food choices. |
| | [https://www.cde.state.co.us/cohealth/nutrition](https://www.cde.state.co.us/cohealth/nutrition) (CDE Nutrition Resources Page) |
| **Student Resources:** | [http://www.chooosemyplate.gov/kids](http://www.chooosemyplate.gov/kids) (Myplate kids place) |
### Prior Knowledge and Experiences

These ongoing learning experiences build upon a presumed student working knowledge of the concepts such as healthy and unhealthy food choices, survival, and living and non-living characteristics. This unit will scaffold from these concepts to allow students to develop a better understanding of the importance of positive decision making and how food choices and structures and functions of the organisms affect its survival in its environment.

### Learning Experience # 1

The teacher may introduce the concepts of living and non-living organisms in an environment so students can begin to examine the interactions of the two.

**Integration Continuum Color:** GREEN BLUE PINK YELLOW

Yellow: Peripheral affective goals are met through the work. Learning is demonstrated in one discipline or the other, but not both.

| Generalization Connection(s): | An organism’s (plants, animals and humans) wellness and survival depends on its environment, habitat, choices and habits. |
| Teacher Resources: | Utah Education Network (Lesson plan ideas)  
PBS Learning Media (Lesson plan ideas) |
| Student Resources: | Graphic Organizers (Samples of graphic organizers) |
| Assessment: | Students will identify what non-living and living components exist within different habitats by creating picture cards and then pass to another group for sorting. |
| Differentiation: | Access (Resources and/or Process)  
Expression (Products and/or Performance) |
### Learning Experience # 2

Over a series of days, the teacher may give students the opportunity to explore various habitats (e.g. desert, polar, rain forest, mountain) so students can critique the suitability of the living and non-living (e.g. plants, animals, rocks) components; and their dependence on their habitat.

**Integration Continuum Color:** GREEN BLUE PINK YELLOW

**Yellow:** Peripheral affective goals are met through the work. Learning is demonstrated in one discipline or the other, but not both.

#### Generalization Connection(s):

An organism’s (plants, animals and humans) wellness and survival depends on its environment, habitat, choices and habits.

#### Teacher Resources:

- [http://goo.gl/kDchgS](http://goo.gl/kDchgS) (Tundra)
- [http://goo.gl/01omjg](http://goo.gl/01omjg) (Habitats of the world)

#### Student Resources:

- [http://goo.gl/01omjg](http://goo.gl/01omjg) (Habitats of the world)

#### Assessment:

Students will draw a habitat over a series of days, with appropriate plants and animals (living) and non-living components of that habitat.

#### Differentiation:

(Multiple means for students to access content and multiple modes for students to express understanding.)

<table>
<thead>
<tr>
<th>Access (Resources and/or Process)</th>
<th>Expression (Products and/or Performance)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The teacher may:</td>
<td>Students may:</td>
</tr>
<tr>
<td>- Allow students to choose their own animal/habitat</td>
<td>- Create a multimedia presentation</td>
</tr>
<tr>
<td>- Provide a photo that features living and non-living objects</td>
<td>- Work in collaborative groups</td>
</tr>
</tbody>
</table>

#### Critical Content:

- The non-living components of an environment.

#### Key Skills:

- Analyze and interpret data about non-living components of a habitat

#### Critical Language:

Organisms, Habitat, Living Components, Non-Living Components, Environment, Observation, Describe
### Extensions for depth and complexity:

<table>
<thead>
<tr>
<th>Access (Resources and/or Process)</th>
<th>Expression (Products and/or Performance)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The teacher may:</td>
<td>Students may</td>
</tr>
<tr>
<td>● Provide opportunities to research and present different components of different habitats</td>
<td>● Present multiple habitats through drawings or multimedia presentations</td>
</tr>
</tbody>
</table>

### Critical Content:
- How organisms depend on their environment
- The non-living components of an environment
- Why an organism can survive in its habitat
- Why a habitat is suitable for a specific habitat
- Why a habitat is not suitable for a specific organism
- Different organisms have different needs

### Key Skills:
- Use evidence to develop a scientific explanation about how organisms depend on their habitat
- Analyze and interpret data about non-living components of a habitat
- Assess and provide feedback on other scientific explanations regarding why an organism can survive in its habitat
- Identify the different organisms and their needs
- Describe different ways that scientists seek to understand about organisms and their interactions with their environment
- Collaborate with other students in developing a scientific explanation about how organisms depend on their habitat
- Use evidence to develop an explanation as to why a habitat is suitable for a specific organism
- Use evidence to develop an explanation as to why a habitat is not suitable for a specific organism

### Critical Language:
Scientific Explanation, Evidence, Analyze, Describe, Organism, Advantages, Population, Environment, Suitable, Resources, Unique

### Learning Experience # 3

The teacher may challenge students to connect ideas about animals and their environment to how humans interact with their environment.

**Integration Continuum Color:** GREEN BLUE PINK YELLOW
Pink: Both disciplines work combines some techniques, skills, and concepts from both disciplines, but proficiency is uneven

**Generalization Connection(s):**
An organism’s (plants, animals and humans) wellness and survival depends on its environment, habitat, choices and habits. An organism’s behavior, such as awareness of body signals, enhances its ability to function better.

**Teacher Resources:**
- Animal Adaptations (Animal adaption lessons)

**Student Resources:**
### Assessment:
Students will create two advertisements expressing the adaptations that humans and animals make, that are dependent on the environment in which they live (e.g. someone moving to Colorado for a year from a different environment) (e.g. coyote living in the open space of nearby neighborhood).

### Differentiation:
(Multiple means for students to access content and multiple modes for students to express understanding.)

<table>
<thead>
<tr>

<td>● Provide template to guide students thinking</td>
</tr>
<tr>
<td></td>
<td>● Provide sample using prompts from different categories</td>
</tr>
</tbody>
</table>

### Extensions for depth and complexity:

<table>
<thead>
<tr>
<th>Access (Resources and/or Process)</th>
<th>Expression (Products and/or Performance)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The teacher may:</td>
<td>Students may:</td>
</tr>
<tr>
<td>● Consider implications from natural disasters</td>
<td>● Identify different ways may affect changes in their behavior/habitat</td>
</tr>
</tbody>
</table>

### Critical Content:
- How organisms depend on their environment
- Different organisms have different needs
- Why a habitat is suitable for a specific organism
- Why a habitat is not suitable for a specific organism
- The behaviors of a population that help that population survive

### Key Skills:
- Use evidence to develop a scientific explanation about how organisms depend on their habitat
- Identify the different organisms and their needs
- Analyze and interpret data about behaviors of a population that help that population survive

### Critical Language:
Analyze, Habit, Healthy, Explain, Describe, Identify, Benefits, Consequences, Awareness, Consumption, Choices, Organism, Habitat, Living Components, Non-Living Components, Environmental Health, Basic Needs, Behaviors, Structures, Survive, Advantages, Unique, Populations, Environments, Resources

### Learning Experience # 4
The teacher may provide examples of healthy vs unhealthy foods, so students can begin to analyze decisions about food choices.

**Integration Continuum Color:** GREEN BLUE PINK YELLOW

Yellow: Peripheral affective goals are met through the work. Learning is demonstrated in one discipline or the other, but not both.

**Generalization Connection(s):**
The consumption of a variety of foods can impact an organism’s energy and overall health.

**Teacher Resources:**

</tr>
<tr>
<td></td>
<td>● Create visuals to represent additional needs</td>
</tr>
<tr>
<td></td>
<td>● Extend the length of the eating plan they develop</td>
</tr>
</tbody>
</table>

**Critical Content:**
- The benefits of healthy food and beverage choices
- The benefits of daily breakfast and water intake
- The body signals of being full or hungry

**Key Skills:**
- Choose healthy foods and beverages
- Choose a variety of healthy snacks
- Recognize when they are full or hungry
- Identify healthy foods and beverages

**Critical Language:**
- Explain, Survive, Healthy, Habit, Basic Need, Behaviors, Suitable, Body Signals, Balanced Diet, Energy

**Learning Experience # 5**
The teacher may provide examples of various animal structures so students can begin to have an understanding of how the structures enable a population to survive.

**Integration Continuum Color:**
GREEN  BLUE  PINK  YELLOW
Yellow: Peripheral affective goals are met through the work Learning is demonstrated in one discipline or the other, but not both.

**Generalization Connection(s):**
The structures and function of body systems depend on an organism’s behavior in relation to food and water consumption.

**Teacher Resources:**
- http://goo.gl/JUUbyV (Using the book What Do You Do With A Tail Like This?)
- https://goo.gl/JHi6Zw (Book, What Do You Do With A Tail Like This?, by Steve Jenkins)
- https://goo.gl/eptcTK (What Do You Do With A Tail Like This? Read along)
Student Resources: 
https://goo.gl/7xUxPb (Pictures for students to look at for structures of animals)

Assessment:
With an animal of choice, students pick a structure that helps it survive in that environment and complete the sentence stem, “What do you with a __________like that?” (e.g. feet, teeth, paws) Then write 2 -3 sentences describing how the structure helps the animal survive.

Differentiation:
(Multiple means for students to access content and multiple modes for students to express understanding.)

Access (Resources and/or Process) | Expression (Products and/or Performance)
--- | ---
The teacher may:
- Provide illustrations and selections for students
- Meet individually with students
- Provide examples of already completed sentence stems | Students may:
- Work in pairs, partners or groups
- Present to the class about their habitat
- Utilize a word bank of choices

Extensions for depth and complexity:

Access (Resources and/or Process) | Expression (Products and/or Performance)
--- | ---
N/A | Students may:
- Choose more than one structure that helps an organism survive
- Write extended sentences

Critical Content:
- The structures of a population that help that population survive
- The behaviors of a population that help that population survive

Key Skills:
- Assess and provide feedback on other scientific explanations regarding why an organism can survive in its habitat
- Analyze and interpret data about behaviors of a population that help that population survive
- Analyze and interpret data about structures of a population that help that population survive

Critical Language:
Analyze, Habitat, Explain, Describe, Organisms, Survive, Advantages, Unique, Functions

Learning Experience # 6

The teacher may utilize examples of animals previously studied so students can begin to make generalizations of how animal behaviors in a population help it to survive.

Integration Continuum Color: GREEN  BLUE  PINK  YELLOW
Yellow: Peripheral affective goals are met through the work Learning is demonstrated in one discipline or the other, but not both.

Generalization Connection(s):
An organism’s (plants, animals and humans) wellness and survival depends on its environment, habitat, choices and habits. The structure and function of body systems depend on an organism’s behavior in relation to food and water consumption.

Teacher Resources:
http://goo.gl/n44Hi (Animal adaptation, lesson)
http://goo.gl/es5UEO (Animal science links)

Student Resources:
http://goo.gl/es5UEO (Animal science links)
**Assessment:**

Students will act out and describe three characteristics about their animal (e.g. season, fur, walk, food, color) to the class and the class will try to guess their animal and how it survives in its environment.

**Differentiation:**

(Multiple means for students to access content and multiple modes for students to express understanding.)

<table>

</tbody>
</table>

**Critical Content:**

- Why an organism can survive in its habitat
- The behaviors of a population that help that population survive

**Key Skills:**

- Assess and provide feedback on their scientific explanations regarding why an organism can survive in its environment
- Identify the different organisms and their needs
- Analyze and interpret data about behaviors of a population that help that population survive

**Critical Language:**

- Scientific Explanation, Evidence, Observation, Describe, Organisms, Habitat, Behaviors, Survive, Population, Environment

---

**Learning Experience # 7**

The teacher may utilize examples of an organism’s behavior, such as body awareness, or signals, that enhance its ability to function better. (e.g. shivering, thirst, hunger, tiredness)

**Integration Continuum Color:** GREEN BLUE PINK YELLOW

Yellow: Peripheral affective goals are met through the work. Learning is demonstrated in one discipline or the other, but not both.

**Generalization Connection(s):**

An organism’s behavior, such as awareness of body signals, enhances its ability to function better.

**Teacher Resources:**

- [http://teachingtools.ophea.net/activities/level-up/ages-6-to-10/hunger-and-thirst-cues](http://teachingtools.ophea.net/activities/level-up/ages-6-to-10/hunger-and-thirst-cues) (Lesson idea)
- [http://www.learnnc.org/lp/editions/nutrition/6642](http://www.learnnc.org/lp/editions/nutrition/6642) (Lesson idea)

**Student Resources:**

- [http://www.kidsssciencechallenge.com](http://www.kidsssciencechallenge.com) (organisms’ behaviors)

**Assessment:**

Students will describe in complete sentences, 2 different ways their body signals when they are thirsty, hungry and tired etc. and will hypothesize why and how to remedy the situation.
**Differentiation:**
(Multiple means for students to access content and multiple modes for students to express understanding.)

<table>
<thead>
<tr>
<th>Access (Resources and/or Process)</th>
<th>Expression (Products and/or Performance)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The teacher may:</td>
<td>Students may:</td>
</tr>
<tr>
<td>● Meet with one student at a time</td>
<td>● Provide the location you might be located in (e.g. dessert, Antarctica)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Access (Resources and/or Process)</th>
<th>Expression (Products and/or Performance)</th>
</tr>
</thead>
<tbody>
<tr>
<td>N/A</td>
<td>Students may:</td>
</tr>
</tbody>
</table>

**Critical Content:**

- The body signals of being full or hungry
- The behaviors of a population that help that population survive

**Key Skills:**

- Analyze and interpret data about behaviors of a population that help that population to survive
- Recognize when they are full or hungry

**Critical Language:**

- Explain
- Describe
- Identify
- Awareness
- Body Signals

**Learning Experience # 8**

The teacher may ask the students to assume the role of zoologist so that students can describe different ways scientists study animals and their environments.

**Integration Continuum Color:** Green Blue Pink Yellow

Yellow: Peripheral affective goals are met through the work. Learning is demonstrated in one discipline or the other, but not both

**Generalization Connection(s):**

An organism’s (plant, animals and humans) wellness and survival depends on its environment, habitat, choices and habits.

**Teacher Resources:**

- Habitats of the world (Habitats)
- CDE’s Tools for Teachers (Teaching tools for teachers)

**Student Resources:**

- Habitats of the world (Habitats)

**Assessment:**

Students will research an animal of their choice and present their findings about their animals environment to the class as if they were a Zoologist.

### Key Skills:

| N/A                                                                 | N/A                                                                 |

### Critical Language:

| N/A                                                                 | N/A                                                                 |

### Learning Experience # 9

The teacher may ask students to make observations about a habitat so that the students can use the evidence gathered to determine the health of that environment.

### Integration Continuum Color:  GREEN    BLUE    PINK    YELLOW

Yellow: Peripheral affective goals are met through the work Learning is demonstrated in one discipline or the other, but not both.

### Generalization Connection(s):

An organism’s (plants, animals and humans) wellness and survival depends on its environment, habitat, choices and habits.

### Teacher Resources:

http://goo.gl/yS8of  (How to conduct research graphic organizers, book recommendations, magazines for kids)

### Student Resources:

http://goo.gl/yS8of  (How to conduct research graphic organizers, book recommendations, magazines for kids)

### Assessment:

Students may research an animal and will create a representation of what a healthy environment will look like. (e.g. movie, diorama, research paper, report)
| Critical Content:                      | • How organisms depend on their environment  
|                                     | • Living things depend on the health of their habitats |
| Key Skills:                          | • Use instruments to make observations about habitat components - for example, data can be collected from a fish tank to assess the environmental health  
|                                     | • Use evidence to develop an explanation about how organisms depend on their habitat |
| Critical Language:                   | Scientific Explanation, Data, Evidence, Observation, Healthy, Organisms, Habitat, Environmental Health, Environment |
