This unit was authored by a team of Colorado educators. The template provided one example of unit design that enabled teacher-authors to organize possible learning experiences, resources, differentiation, and assessments. The unit is intended to support teachers, schools, and districts as they make their own local decisions around the best instructional plans and practices for all students.

Kindergarten, Physical Education | Unit Title: Movement and Spatial Awareness | Page 5 of 14
Unit Description:
The purpose of this unit is to allow students to move competently in physical education. Concepts that are focused on include: locomotion, pathways, levels and space. Additionally, skills are being developed to create a safe environment of trust and respect while following rules and understanding the importance of movement, spatial awareness, and pathways. The unit culminates with a performance assessment in which each student becomes an animated movie character to move safely at various speeds within the character’s movie environment.

Unit Generalizations

Key Generalization (s):
Variation of movement patterns will lead to a more responsible mover traveling through space.

Supporting Generalizations:
Identification of different pathways and levels while performing similar movements demonstrates variation. Respect of others while moving keeps everyone safe.

Considerations:
Before teaching a movement and spatial awareness unit in physical education, please consider:
- Culture and language
- Space
- Equipment
- Length of class
- Time of year the unit would be taught
- Full day versus half day
- Accommodations (e.g. IEP, 504, etc.) and modifications

Performance Assessment: The capstone/summative assessment for this unit.

Claims:
(Key generalization(s) to be mastered and demonstrated through the capstone assessment.)
Variation of movement patterns will lead to a more responsible mover traveling through space.

Stimulus Material:
(Engaging scenario that includes role, audience, goal/outcome and explicitly connects the key generalization)
You will become an animated movie character (e.g. Lightning McQueen, Bambi, Nemo, etc.) to move safely at various speeds within your character’s environment (e.g. woods, roads, ocean, etc.). You will travel (e.g. slow, medium, fast, etc.) through your environment using various pathways (e.g. straight, curved, zigzag, etc.) without bumping into other characters, to get to your destination. You will demonstrate this to your teacher’s signal (e.g. music, whistle, timer, etc.).

Product/Evidence:
(Expected product from students)
Students will create a journey using their animated movie character (e.g. Lightning McQueen, Bambi, Nemo, etc.) performing locomotor movements (e.g., walk, run, gallop, etc.) and demonstrating multiple pathways (e.g. straight, curved, zigzag, etc.) to travel through their environment (e.g. plumbing, ocean/marine life, race track, etc.) to get to their destination. Students will demonstrate travel through space, levels, creation, respect and responsibility for the teacher and/or peers.

Examples of Elements in Travel:

### Skills:

- Demonstrate contrasts between slow and fast speeds while using locomotor skills.
- Travel within a large group without bumping into others or falling, while using a variety of locomotor skills.
- Identify body planes such as front, back and side.
- Travel in straight, curved and zigzag pathways.
- Put skills into different game situations.

**Assessment:**

Students will demonstrate examples of respecting others when moving that includes being safe. Additionally, students will demonstrate the ability to travel using various locomotor motor skills such as skipping, galloping, walking, running, and hopping.
### Prior Knowledge and Experiences

It is presumed that kindergarten students have prior learning experiences and/or working knowledge of: spatial awareness, personal awareness, vocabulary, ability to follow instructions, and basic motor skills. However, it cannot be assumed that all students have had the same family infrastructure and opportunity to attend preschool/daycare to achieve the same developmental milestones.

### Learning Experience # 2

**Task Description:**

*The teacher may... so that students can...*

The teacher may introduce spatial concepts (e.g. personal, general, boundaries, etc.) so students can begin to apply during activities and games.

**Generalization Connection(s):**

Variation of movement patterns will lead to a more responsible mover traveling through space.

**Teacher Resources:**

- [http://www.pecentral.org/lessonideas/ViewLesson.asp?ID=9471#.WEMF97IrLIU](http://www.pecentral.org/lessonideas/ViewLesson.asp?ID=9471#.WEMF97IrLIU) (Hula Hoop Car Road Trip Variation)

- [http://physedgames.com/?s=line+tag](http://physedgames.com/?s=line+tag) (Line Tag Game)

**Assessment:**

Students will participate in a variation of Hula Hoop Cars to demonstrate spatial awareness (e.g. lines, boundaries, speed, etc.). The activity requires students to navigate their environment.

### Differentiation:

(Multiple means for students to access content and multiple modes for student to express understanding.)

**Access (Resources and/or Process):**

- The teacher may:
  - use visuals/pictures so students can change movements.
  - provide a variety of equipment with different texture and sizes (hoops, frisbees, rings, etc.).

**Expression (Products and/or Performance):**

- Students may:
  - use pictures to participate in the movements.
  - access a variety of equipment that meets their needs.
## Critical Content:
- Variety of locomotor skills without bumping into others or falling within a large group.
- Straight, curved and zigzag pathways.
- Skills in different game situations.
- Contrasts between slow and fast speeds while using locomotor skills.

## Key Skills:
- Travel within a large group without bumping into others or falling, while using a variety of locomotor skills.
- Travel in straight, curved and zigzag pathways.
- Put skills into different game situations.
- Demonstrate contrasts between slow and fast speeds while using locomotor skills.

## Critical Language:

### Learning Experience # 3

#### Task Description:
*The teacher may... so that students can...*

The teacher may model an array of pathways (e.g. straight, zigzag, curve, etc.) so students can begin to identify different ways to travel.

#### Generalization Connection(s):
Variation of movement patterns will lead to a more responsible mover traveling through space. Identification of different pathways and levels while performing similar movements demonstrates variation.

#### Teacher Resources:
- [http://www.pecentral.com/lessonideas/ViewLesson.asp?ID=11920#.WEMdxKIrIU0](http://www.pecentral.com/lessonideas/ViewLesson.asp?ID=11920#.WEMdxKIrIU0) (Locomotor Movement Game)

#### Assessment:
Students will follow different pathways (e.g. straight, zigzag, curve, etc.) to travel (e.g. skip, jog, walk, etc.) in different directions (e.g. forward, backwards, sideways, etc.) by participating in a treasure hunt.

#### Differentiation:
(Multiple means for students to access content and multiple modes for student to express understanding.)

### Learning Experience # 4

#### Task Description:

The teacher may... *so that students can...*

The teacher may cultivate an appreciation of diversity through differentiation, creativity, change, and alteration so students can explore movement variations (e.g. body awareness, spatial awareness, relationship concepts, etc.).

#### Generalization Connection(s):

Identification of different pathways and levels while performing similar movements demonstrates variation.
