Pre-Revision Survey Results

May 2021
Introduction

The State Board of Education is required to review and revise approximately one-third of the standards beginning in 2022 and an additional one-third every two years thereafter (22-7-1005(6) C.R.S.). The 2020-21 school year is the first year of implementation of the standards that were revised in 2018. One-third of the standards that were adopted in 2018 will begin the review and revision cycle beginning in the Fall of 2020.

A short pre-revision survey was created based on a previous survey from 2016 conducted by Hanover Research. Survey monkey was used to capture the public’s feedback and the survey was intended to solicit high-level feedback about our current standards up for revision: Dance, Drama/Theatre, Music, Social Studies, and Visual Arts. The survey was open from January 5 – April 30, 2021 and 150 people responded to the survey.

Demographic Results

Role

K-12 educators represented most respondents at 65%, then K-12 administrators at 12%, Institutions of Higher Education and the general public at 3%, and all other categories at less than 2%.
Race and Ethnicity
The most represented race amongst respondents was white (72%), followed by those who preferred not to answer (14%) and black or African American. All others were at or below 2%.

School Type
Public schools/non-charter or magnet represented the most respondents at 96%, while charter/magnet school represented the other 4%. There were no respondents representing private schools.
Role in the District

The respondents who declared their primary role as a K-12 teacher or administrator were further disaggregated into their specific role in the district. Teachers represented 76%, district-level administrators were 11%, school administrator and specialized services represented 4%, and all others were below 4%.

Grade Levels taught by K-12 Teachers

The respondents who stated their role was a K-12 teacher were then asked what grade levels they taught. This data was captured in grade-bands. Most teachers who responded were in grades 3-5 (30%), then 6-8 and 9-12 (29%), followed by K-2 (10%), and finally early childhood (2%).
Type of Higher Education Institution

Respondents who stated their role was within an Institution of Higher Education were then asked about the type of institution they represented. Colleges/University educator preparation programs represented the most (43%), followed by Colleges/University content area professor/instructor (41%), Other (12%), Community Colleges (3%), and Career and Technical Education (2%).
