BASED ON A CURRICULUM
OVERVIEW SAMPLE AUTHORED BY
Colorado Springs School District
Anne Dunn

Colorado State University
Patrick Fahey, PhD

This unit was authored by a team of Colorado educators. The template provided one example of unit design that enabled teacher-authors to organize possible learning experiences, resources, differentiation, and assessments. The unit is intended to support teachers, schools, and districts as they make their own local decisions around the best instructional plans and practices for all students.

### Colorado 21st Century Skills

- **Critical Thinking and Reasoning:** Thinking Deeply, Thinking Differently
- **Information Literacy:** Untangling the Web
- **Collaboration:** Working Together, Learning Together
- **Self-Direction:** Own Your Learning
- **Invention:** Creating Solutions

The Colorado Academic Standards for Visual Arts are not intended to be taught in a linear (checklist of coverage) fashion, but rather should be implemented as a cyclical creative process. Each unit within this sample blueprint intentionally includes standards from all four visual arts standards to illustrate this process-based philosophy.

Critical Language: includes the Academic and Technical vocabulary, semantics, and discourse which are particular to and necessary for accessing a given discipline.

**EXAMPLE:** A student in Language Arts can demonstrate the ability to apply and comprehend critical language through the following statement: *“Mark Twain exposes the hypocrisy of slavery through the use of satire.”*

<table>
<thead>
<tr>
<th>A student in _____________ can demonstrate the ability to apply and comprehend critical language through the following statement(s):</th>
<th>Cultural identity is expressed through art works that are built from traditions, available tools and resources, and changing needs throughout time.</th>
</tr>
</thead>
</table>

**Academic Vocabulary:** Tradition, culture, embellishment, theme, compare and contrast

**Technical Vocabulary:** Expressive features and characteristics of art, organic shape, motif, symmetry
**Unit Description:**
In this unit, students will connect the elements of personal culture and tradition through self-portraiture and map rendering. Students will be asked to reflect upon their own cultural identity and/or traditions through researching geographical elements and discussion of the influence of geography on personal identity. Students will analyze how individuals and communities express their cultural identity through works of art. This unit culminates in a final project asking students to tell their own personal story through a “Self Portrait as Map” final artwork.

**Considerations:**
As a unit focusing on personal identity through the cultural and historical perspective related to geography, it is important to ensure students understand the context of how/why some cultures may have similarities and differences. It should also be clear that a final self-portraiture piece does not have to be a face. The idea of a self-portrait in this context is to build a piece of art that “maps the artist’s personal story” which may or may not include their face. When technology is referred to in this unit, a broad definition of technology (beyond electronics) should be applied within the context of the culture being studied such as architecture, artistic techniques, agricultural techniques etc. Teachers are encouraged to include examples of contemporary art and/or art that incorporate blended cultural traditions when using artifacts and examples.

**Performance Assessment:** *The capstone/summative assessment for this unit.*

<table>

<tr>
<th>Claims: (Key generalization(s) to be mastered and demonstrated through the capstone assessment.)</th>
<th>Culture and historical traditions inform themes found in works of art</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Stimulus Material:</strong> (Engaging scenario that includes role, audience, goal/outcome and explicitly connects the key generalization)</td>
<td>You are a promising new artist that has been invited to show your work in an exhibition titled: <em>Self-Portrait as Map</em>. Your artwork, drawing inspiration from the idea of maps, must “tell your story” for the viewers of the show. Your artwork should reveal details from your culture and/or historical traditions, where you are from, likes and dislikes, as well as your future ambitions.</td>
</tr>
<tr>
<td><strong>Product/Evidence:</strong> (Expected product from students)</td>
<td>Students will work individually to determine an organized, purposeful, exhibit-ready artwork. They will use visual cues to reflect knowledge of their personal culture, tradition, geographical influences, and other personal contexts shared through self-portraiture. The students will create a text panel description explaining their map as a narrative “map key”. Students should be evaluated on their artwork and narrative description related to artistic elements used, accuracy of skills and techniques as well as reasoning for the use of expressive features and characteristics of art within the artwork.</td>
</tr>
</tbody>
</table>
| **Differentiation:** (Multiple modes for student expression) | Students may:  
- Embed other “map elements” such as; a compass rose indicating metaphorical directions within their piece.  
- Include use of primary languages within the piece or within the text description.  
- Provide a narrative that compares and contrasts their self-portraiture map to a more traditional geographical map  
- Provide an analytical essay that argues the pros and cons of an artistic rendering map making process to a cartographers requirements in map making  
- Offer additional map-based art making such as: mapping the imagination or mapping the creative process  
- These artworks can be developed using a multitude of media including but not limited to technology-based, 2-dimensional and 3-dimensional etc. |

### Prior Knowledge and Experiences

These ongoing learning experiences build upon a presumed (student) ability to function responsibly and safely in an art studio environment to include the appropriate use of tools and materials. Students will be encouraged to use descriptive vocabulary and persist through art making. Successful learning will draw upon grade level knowledge of and ability to use the expressive features and characteristics of art.

### Critical Content:
- Cultural and historical traditions related to masks
- Styles and motifs (repetitive patterns) found in maps
- Cultural influences symbolized in maps

### Key Skills:
- Use expressive features and characteristics to describe culturally informed art
- Compare and contrast attributes

### Critical Language:
Culture, attributes, geography, elements and principles in art, traditions, purpose, intention, characteristics, function, motif, biome

### Learning Experience # 2
The teacher may use an artistic map rendering (e.g., Colorado Department of Education’s Colorado Map) so that students can begin to consider the similarities and differences between an artistic rendering of a map and a traditional map.

### Generalization Connection(s):
- Culture and historical traditions inform themes found in works of art

### Critical Content:
- Cultural and historical traditions related to masks
- Styles and motifs (repetitive patterns) found in maps
- Cultural influences symbolized in maps

### Key Skills:
- Use expressive features and characteristics to describe culturally informed art
- Compare and contrast attributes

### Critical Language:
Culture, attributes, geography, elements and principles in art, traditions, purpose, intention, characteristics, function, motif, biome

---

### Learning Experience # 3

The teacher may discuss (using maps from previous experience and resources) the use and purpose of legends and symbols found on maps so that students can begin to discern how map makers and artists use icons and images to communicate. (e.g., to represent places, resources, items of interests, land forms)

### Generalization Connection(s):
- Culture and historical traditions inform themes found in works of art
- The availability of materials, tools and technology can determine perceived value in cultural works of art

### Teacher Resources:
- Various room map examples: existing classroom map examples
- Me on the Map- Joan Sweeney (280L Lexile Level)
- Everything Sings: Maps for a Narrative Atlas-Denis Wood
- Follow That Map: A First Book of Mapping Skills-Scott Ritchie (590L Lexile Level)

### Student Resources:
N/A

### Assessment:
- Students will create a simple traditional map of the classroom with legend to identify the location of learning resources and supplies in the room. Students will use their journal to sketch the classroom map once it is completed.

**Assessment:**
Students will create an artistic rendering of a map of the school (or another location) important resources and facilities. (For example, the cafeteria might be represented as a pizza, the gym as a large basketball, the library as a swirling tornado of words and letters—all connected by footprints). Students will add reflections to their journals around the pros and cons to map creation between the two styles (traditional and artistic rendering)

**Differentiation:**
(Multiple means for students to access content and multiple modes for student to express understanding.)

**Extensions for depth and complexity:**

**Critical Content:**
- Cultural elements related to maps
- Styles and motifs (repetitive patterns) found in maps
- Expressive features and characteristics of art
- Examples of symbolic representation in maps

**Key Skills:**
- Use expressive features and characteristics to describe culturally informed art.

**Critical Language:**

### Learning Experience # 5

**The teacher may use several maps of the same place so that students can understand how maps can be used to tell different stories.**

**Generalization Connection(s):**
Culture and historical traditions inform themes found in works of art

**Teacher Resources:**
- Various maps of Colorado that tell different cultural and/or historical stories about the state:
