- **Information Literacy:** Untangling the Web
- **Collaboration:** Working Together, Learning Together
- **Self-Direction:** Own Your Learning
- **Invention:** Creating Solutions

The Colorado Academic Standards for Visual Arts are not intended to be taught in a linear (checklist of coverage) fashion, but rather should be implemented as a cyclical creative process. Each unit within this sample blueprint intentionally includes standards from all four visual arts standards to illustrate this process-based philosophy.

### Unit Description:
In this unit students will explore symbols, cultural meaning, juxtaposition, re-contextualization, and cultural value through the lens of Pop Art. Students will begin by researching and studying the historical context and influence of Pop Art and move into a focus on the transformation of cultural meaning using symbols and everyday objects in new and inventive ways. Across the unit, students will explore the roles of color, language, irony, etc in seminal works of Pop Art and experiment with creating their own Pop Art commentaries. The unit culminates with the students creating an artistic expression/commentary on a relevant school/community issue.

### Considerations:
Symbols are different than commercially produced signs and logos. Instruction should make sure that students understand the meaning of each. This unit will explore the ironic and social commentary uses of popular and commercial icons/signs/logos with Pop Art expressions. As is always the case with the use of artistic visual images in a school environment, all resources should be pre-screened by teachers before use.

Influenced by the history and genre of pop art, you consider how to use transformation to repurpose commonly used symbols/language to create a finished two- or three-dimensional art work that expresses a particular point of view on a community issue. This art work will be a large scale mural (painting) or sculpture that will be on public display.</td>
</tr>
<tr>
<td>Product/Evidence: (Expected product from students)</td>
<td>Students will create finished artwork that creates cultural meaning using the expressive features of pop art such as heavy outlining, size variation, bright colors, collage, repetition and juxtaposition. Criteria for evaluating this work will include but are not limited to; symbols and everyday objects form personal culture, transformation of their personal symbol/object using a specific pop culture technique, and the ability to create disparate cultural meaning of their chosen symbol/object.</td>

| Differentiation: (Multiple modes for student expression) | Students can individualize their process through the following options:

  - Work collaboratively to create large-scale projects |
